

SUPPLEMENTARY FIGURE. Monthly proportion of total COVID-19 hospitalizations and total COVID-19 in-hospital deaths that were primarily for COVID-19* — Premier Healthcare Database Special COVID-19 Release,[†] United States, April 2020–June 2022

* Total COVID-19 hospitalizations and COVID-19 in-hospital deaths are those with a primary or secondary discharge diagnosis of COVID-19 (i.e., *International Classification of Diseases, Tenth Revision, Clinical Modification* code of U07.1). Hospitalizations and in-hospital deaths primarily for COVID-19 had a primary discharge diagnosis of COVID-19 or a secondary discharge diagnosis of COVID-19 accompanied by either treatment with remdesivir or a primary diagnosis of sepsis, pulmonary embolism, acute respiratory failure, or pneumonia.

[†] August 2, 2022, data release. Data are from 678 hospitals that had at least one inpatient record per month during April 2020–May 2022.
