

Supplemental Table 2. Coverage changes at 6- and 18-month follow-up for HPV vaccine initiation among patients ages 11-12 ($n=98,682$)

	Coverage change at 6 months		Coverage change at 18 months	
	% points	(95% CI)	% points	(95% CI)
Control (59 clinics)	10.1	(9.0, 11.2)	20.6	(19.1, 22.1)
QI Coaching (90 clinics)	10.4	(9.4, 11.6)	23.2	(21.6, 24.8)
Communication Training (33 clinics)	9.4	(8.4, 10.5)	20.5	(19.0, 22.0)
Combined Intervention (85 clinics)	12.3	(11.1, 13.7)	25.6	(24.0, 27.4)

Note. HPV vaccine coverage change and difference from control account for clustering and are adjusted for clinic's baseline HPV vaccine coverage, state, patients' sex, month, and cluster size. CI: confidence interval; QI: quality improvement.
