

S1 Calculation

Medicare Current Beneficiary Survey (MCBS) Descriptive Analysis: This study analyzed the 2015 MCBS Public Use File (n=12,311), a nationally representative, publicly accessible database from the Centers for Medicare & Medicaid Services. The authors conducted a descriptive analysis that accounted for the complex sample design with survey weights. The study found that 80% of Medicare beneficiaries indicated that they lived in a metro area, and 73% were still driving themselves to the doctor's office.

S1 Table. Estimated Number, Prevalence, and Density (MDPP-Eligible per Square Mile of Land Area) of MDPP-Eligible Part B Beneficiaries, by State

Counties with less than 100 MDPP-Eligible Part B Beneficiaries were excluded. * Proportions of beneficiaries enrolled in Part B (at least one month in Part B) per our study population of Medicare beneficiaries by county. Additionally, readers that are interested in MDPP eligible Part B beneficiaries per 1,000 can multiple the prevalence rates presented in S2 Table by 1,000.

S2 Table. Estimated Number, Prevalence, Density (MDPP-Eligible per Square Mile of Land Area) of MDPP-Eligible Part B Beneficiaries, by County
