

A. S1

B. S2

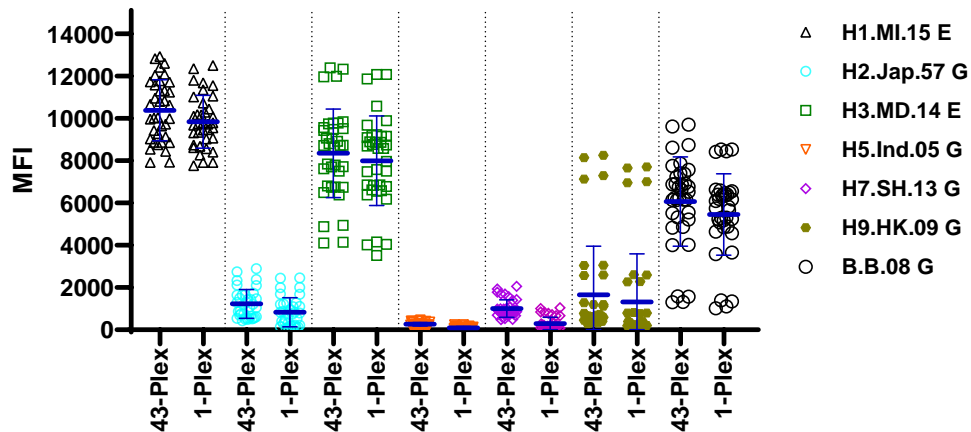

FIG S3 Comparison of MFI values between 43-Plex and 1-Plex MIADA assay. A total 9 paired sera from vaccine recipients in 2018-19 were tested in duplicates at 1:40 dilution by the MIADA assay. The mean and standard deviation of MFIs to seven representative antigens from two independent experiments were plotted. A. S1 (pre-vaccination); B. S2 (post-vaccination).
