

**TABLE S4 Fold rise after mock or 2-Ads among A(H1N1)pdm09 and A(H3N2) infection cases with MFI seroconversion to novel subtype influenza viruses.** Color scale indicates fold rise levels.

Fold rises in MFIs > 2-fold were highlighted in bold.

Cross reactive antibody responses to novel subtype HAs in three out of four patients were induced by exposures to A(H1N1)pdm09 (A/California/07/2009) and/or A/Perth/16/2009 like HAs.
