Data Table				
	May 10	May 11	May 12	May 13
◯ Cases	1	2	2	0
◯ 7-Day Average	0	0	0	0

Download Data (CSV)

Data are updated every Wednesday as soon as they are reviewed and verified. Historical cases may be added as additional information is obtained through case investigations.

* Date is defined as the earliest date available regarding the case, beginning with date of illness onset, diagnosis date, positive laboratory test report date, CDC call center reporting date, or case data entry date into CDC's emergency response common operating platform, DCIPHER.

Case counts include those who tested positive for either monkeypox virus or orthopoxvirus as described in the case definition.

** The 7-day moving average (denoted by the black line) calculates the average number of cases per day in the previous 7 days.
