

**SUPPLEMENTARY FIGURE. Change in percentage of kindergartners who are fully vaccinated with measles, mumps, and rubella vaccine (A), diphtheria, tetanus, and acellular pertussis vaccine (B), poliovirus vaccine (C), and varicella vaccine (D) by state — United States\*, 2020–21 to 2021–22 school years**

**Abbreviations:** DTaP = diphtheria, tetanus, and acellular pertussis vaccine; MMR = measles, mumps, and rubella vaccine.

\* Alaska, Illinois, and West Virginia did not report kindergarten vaccination coverage for the 2020-21 school year and are excluded from this analysis. Montana did not report kindergarten vaccination coverage for the 2021–22 school year and is excluded from this analysis. Maine required only 1 dose of varicella vaccine in 2020-21, and 2 doses for 2021-22, and is excluded from the analysis of varicella vaccination coverage.
