Active Investigations of Multistate Foodborne Outbreaks

Last updated February 1, 2023 (updated every Wednesday)

CDC typically coordinates between 17 and 36 investigations of foodborne illnesses involving multiple states each week. The table below shows the number of active CDC investigations for *Listeria monocytogenes*, *Salmonella*, and Shiga toxin-producing *E. coli*. It also includes links to any current CDC outbreak notices.

Germ	Number of Active Investigations	CDC Outbreak Notices
Listeria monocytogenes	3	<ul style="list-style-type: none"> Investigation Notice: Enoki Mushrooms Investigation Notice: Deli Meat and Cheese
Salmonella	5	<ul style="list-style-type: none"> Food Safety Alert: Alfalfa Sprouts
Shiga toxin-producing E. coli (STEC)	0	<ul style="list-style-type: none"> No active notices

CDC works closely with our federal regulatory partners, FDA and USDA-FSIS, on foodborne outbreak investigations. For more information about how they work to identify and remove contaminated food from the market, visit their website:
