

## **NATIONAL CENTER FOR STATE, TRIBAL, LOCAL, AND TERRITORIAL PUBLIC HEALTH INFRASTRUCTURE AND WORKFORCE**

The National Center for State, Tribal, Local, and Territorial Public Health Infrastructure and Workforce strengthens the nation's public health infrastructure by providing underlying systems, processes, and expertise across critical cross-cutting functional areas and bolstering the Agency's core capabilities. In carrying out its mission, the National Center: (1) engages and coordinates relationships with jurisdictions and CDC's public health partners to provide enterprise management of programs that build and maintain the nation's public health infrastructure (PHI); (2) enhances experiences for funded partners and STLT jurisdictions; (3) develops strategic goals and objectives, provides leadership, scientific oversight, and guidance for PHI; (4) proactively engages and collaborates with centers, institutes, and offices (CIOs) across the Agency to support jurisdictions, external partnerships, and CDC's internal workforce; (5) streamlines and coordinates cross-cutting funding mechanisms in support of PHI; (6) provides support through specific workforce development programming, guidance, TA, and funding for jurisdictions; (7) invests in internal workforce development programs that directly reinforce CDC's capacity to support jurisdictions; (8) identifies and supports implementation of cross-cutting evidence-based approaches to improve public health agency and system performance; (9) establishes and maintains effective strategic relationships, partnerships, and alliances with organizational elements of the public health system; and (10) leads evaluation and reporting activities on the effectiveness of partnership engagement and performance of funding mechanisms.
