Active Investigations of Multistate Foodborne Outbreaks

Last updated March 8, 2023 (updated every Wednesday)

CDC typically coordinates between 17 and 36 investigations of foodborne illnesses involving multiple states each week. The table below shows the number of active CDC investigations for *Listeria monocytogenes*, *Salmonella*, and Shiga toxin-producing *E. coli*. It also includes links to any current CDC outbreak notices.

Pathogen	Number of Active Multistate Investigations	Current CDC Investigation Notices or Food Safety Alerts
Listeria	3	<ul style="list-style-type: none"> Investigation Notice: Unknown Food Source Food Safety Alert: Enoki Mushrooms Investigation Notice: Deli Meat and Cheese
Salmonella	5	<ul style="list-style-type: none"> No active notices or alerts
E. coli	1	<ul style="list-style-type: none"> No active notices or alerts

CDC works closely with our federal regulatory partners, FDA and USDA-FSIS, on foodborne outbreak investigations. For more information about how they work to identify and remove contaminated food from the market, visit their website:
