

FACTS ON MARBURG

We all play an important role in the fight against Marburg.

What is the Marburg Virus?

Marburg is a serious and very contagious disease caused by the Marburg virus.

Up to 9 out of 10 people infected with the virus will die without treatment.

Chances of survival improve when treatment is given early at a treatment center.

How does the Marburg Virus Spread?

The virus spreads when a person is in contact with the body fluids of someone who is sick with or has died from Marburg.
