

## Map of Community Conversations

### Historical Document

This Web site is provided by the Agency for Toxic Substances and Disease Registry (ATSDR) ONLY as an historical reference for the public health community. It is no longer being maintained and the data it contains may no longer be current and/or accurate.

Over a thousand people joined more than 50 community conversations from May through June 2010, to offer input on public health and chemical exposure issues. Mouseover an icon on this map for information on the community conversation(s) held in that location. Click on the map to visit the National Environmental Health Association's (<http://www.neha.org/nationalconversation/index.html>) (<http://www.cdc.gov/Other/disclaimer.html>) Web site, where summary reports from each conversation are available.

### Listed by State
