Areas at Risk for Chikungunya

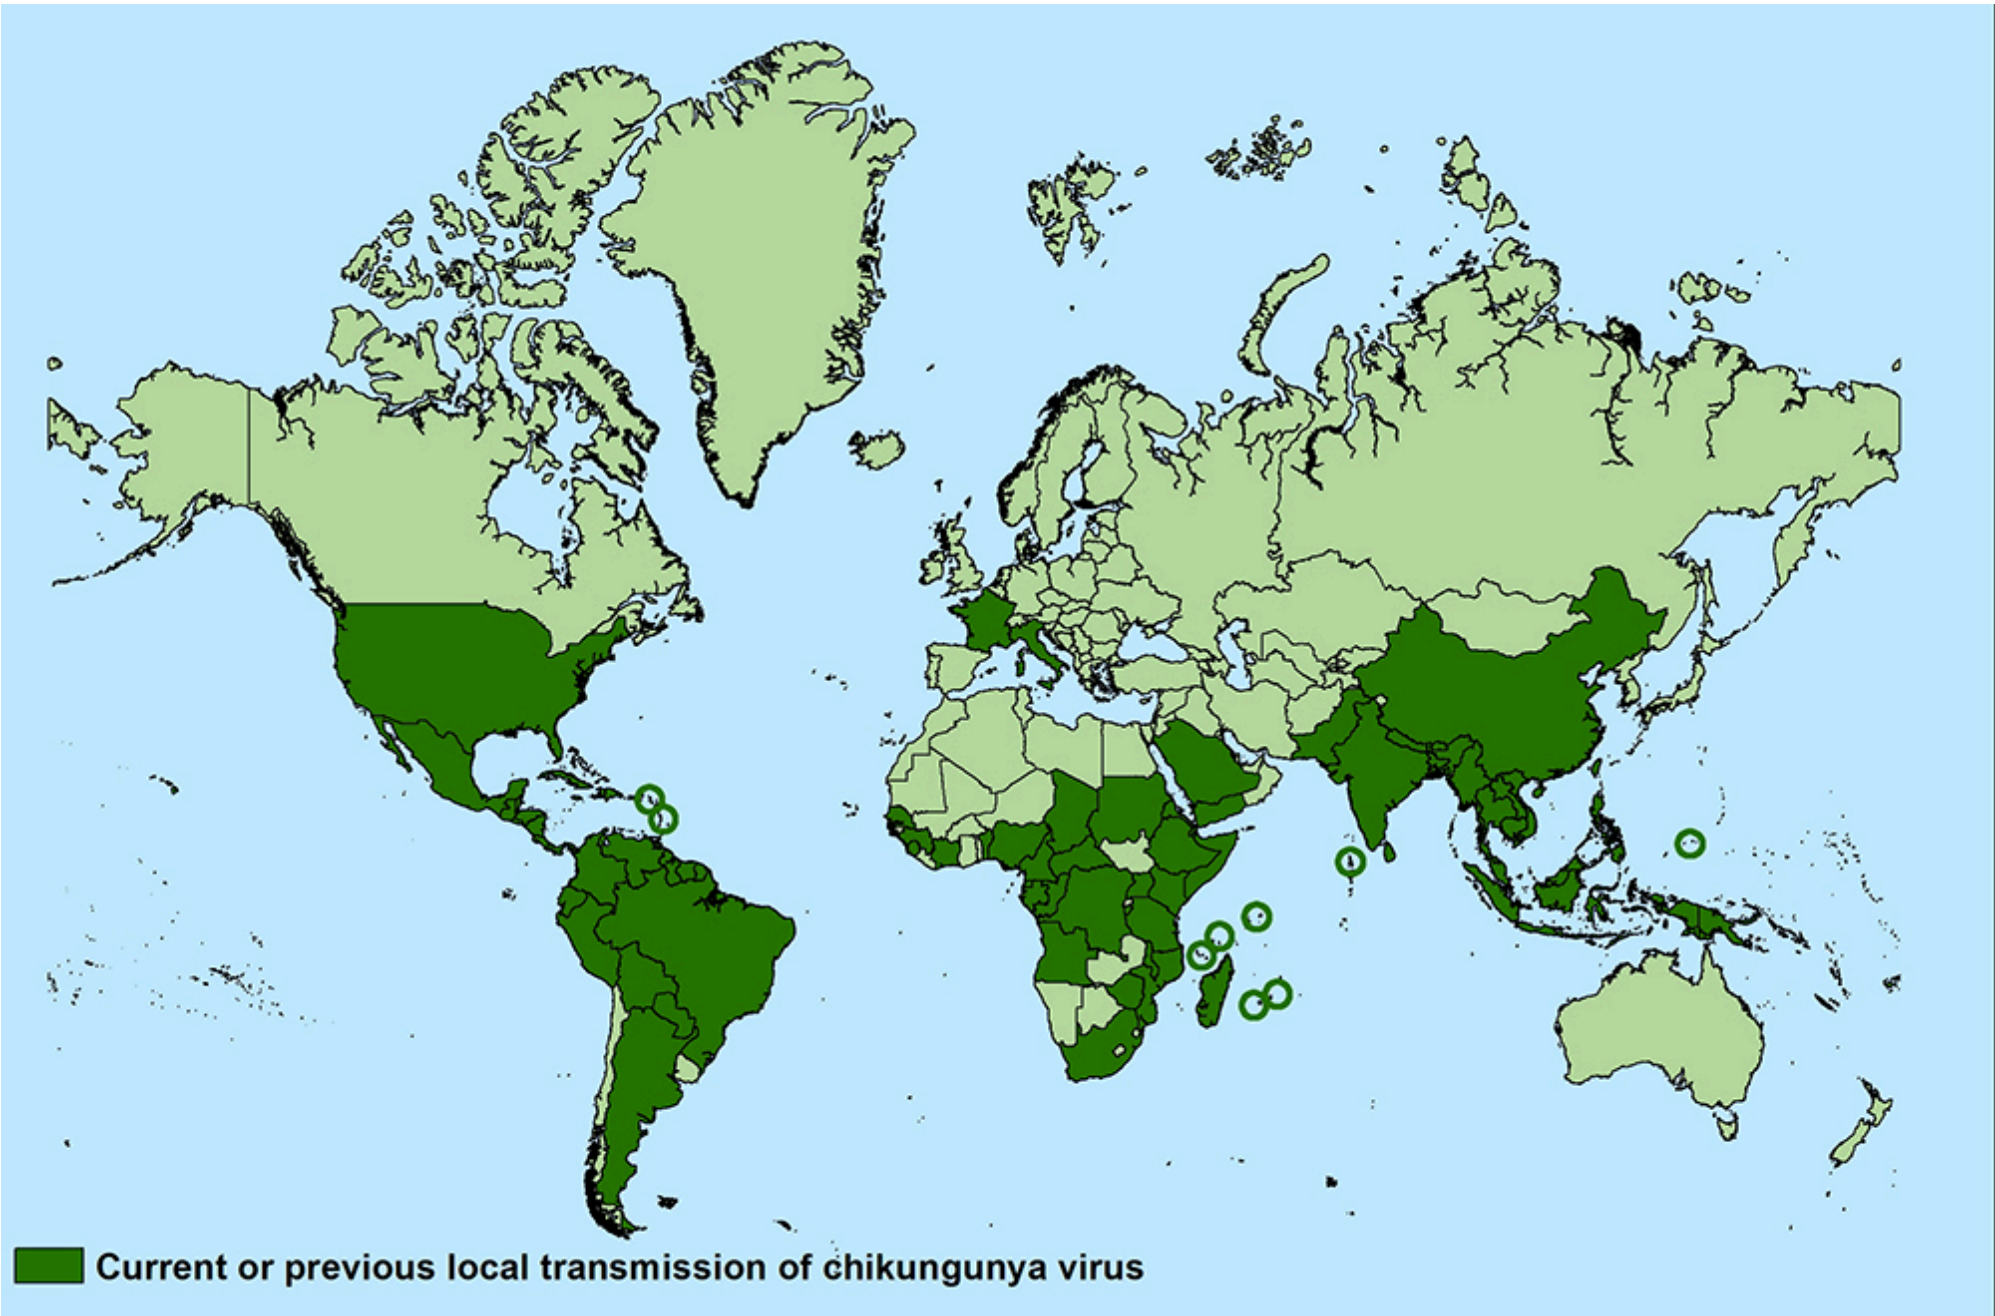

Where Has Chikungunya Virus Been Found?

- Prior to 2013, chikungunya virus cases and outbreaks had been identified in countries in Africa, Asia, Europe, and the Indian and Pacific Oceans.
- In late 2013, the first local transmission of chikungunya virus in the Americas was identified in Caribbean countries and territories. Local transmission means that mosquitoes in the area have been infected with the virus and are spreading it to people. The virus then spread throughout most of the Americas. (See data from PAHOexternal icon).
- For information on current outbreaks, consult CDC’s Traveler’s Health website.
- Click here for more information on chikungunya in the United States.

Chikungunya in the United States

Cases of Chikungunya reported in the United States and US territories.

Countries and territories where chikungunya cases have been reported* (as of October 30, 2020)

*Does not include countries or territories where only imported cases have been documented.
