## Active Investigations of Multistate Foodborne Outbreaks

Last updated April 12, 2023 (updated every Wednesday)

CDC typically coordinates between 17 and 36 investigations of foodborne illnesses involving multiple states each week. The table below shows the number of active CDC investigations for *Campylobacter*, Shiga toxin-producing *E. coli*, *Listeria monocytogenes*, and *Salmonella*. It also includes links to any current CDC outbreak notices.

Germ	Number of Active Multistate Investigations	Current CDC Investigation Notices or Food Safety Alerts
<a href="#">Campylobacter</a>	0	<ul style="list-style-type: none"><li>No active notices or alerts</li></ul>
<a href="#">E. coli</a>	2	<ul style="list-style-type: none"><li>No active notices or alerts</li></ul>
<a href="#">Listeria</a>	3	<ul style="list-style-type: none"><li>Investigation Notice: <a href="#">Unknown Food Source</a></li></ul>
<a href="#">Salmonella</a>	9	<ul style="list-style-type: none"><li>Investigation Notice: <a href="#">Flour</a></li></ul>

CDC works closely with our federal regulatory partners, FDA and USDA-FSIS, on foodborne outbreak investigations. For more information about how they work to identify and remove contaminated food from the market, visit their website:
