

Mpox

U.S. Mpox Case Trends Reported to CDC Data as Reported to CDC as of 10 May 2023 2:00 PM EDT

Beginning February 1, 2023, the data below will be updated every two weeks.

Trends of mpox cases reported to CDC during the 2022 outbreak by date*

Daily Mpox Cases and 7 Day Daily Average

[Download Data \(CSV\)](#)

Data Table				
	May 10	May 11	May 12	May 13
<input type="radio"/> Cases	1	5	0	0
<input type="radio"/> 7-Day Average	0	0	0	0

Data are updated every other Wednesday as soon as they are reviewed and verified. Historical cases may be added as additional information is obtained through case investigations.

* Date is defined as the earliest date available regarding the case, beginning with date of illness onset, diagnosis date, positive laboratory test report date, CDC call center reporting date, or case data entry date into CDC’s emergency response common operating platform, DCIPHER.

Case counts include those who tested positive for either mpox virus or orthopoxvirus as described in the [case definition](#).

** The 7-day moving average (denoted by the black line) calculates the average number of cases per day in the previous 7 days.
