REQUEST FOR PROPOSAL

FOR

**POST DISASTER AERIAL MOSQUITO
CONTROL**

ISSUE DATE: June 9, 2021

DUE DATE: June 23, 2021

1. INTRODUCTION

Brunswick County is soliciting proposals for aerial adulticide of mosquitoes for the County and its municipalities. The contractor is expected to be highly knowledgeable in Federal Aviation Administration regulations, guidelines, and operating policies. The contractor will serve as an advisor and support the County through a disaster recovery effort.

2. PROJECT OVERVIEW

Brunswick County, North Carolina is located in the southernmost region of the state along the NC/SC border. The County is bordered on the west by South Carolina, the north by Columbus County, the east by New Hanover County, and the south by the Atlantic Ocean. The County is one of the largest counties in the state with a land area of approximately 856 square miles. The County has 19 municipalities. The last known fulltime population of Brunswick County is 142,820; however, during the summer this number swells to approximately 250,000. The safety of residents during and after a disaster is a top priority for Brunswick County Government. Part of ensuring the safety of citizens in the aftermath of a disaster is dependent upon timely mosquito suppression applications.

In the past, Brunswick County has been hit by tropical storms and hurricanes. Each of these resulted in minor damages, while some resulted in major damages to the County and its infrastructure. The aftermath of the storms, and the mosquito populations associated with them has overwhelmed the County in the past.

Dependent upon the storm and its impacts, the County Health Director may consider mosquitoes a threat to emergency workers, thereby significantly hampering response and recovery efforts. The threat may be caused by a significant increase in the mosquito population and/or the change in biting species.

Additionally, the County Health Director considers the potential for disease transmission and human exposure to disease carrying mosquitoes based on the detection of arboviral diseases in sentinel organisms in the impacted area prior to the storm event. This coupled with post storm verification from medical facilities within the affected area that an increase in the general public's exposure to mosquitoes has directly resulted in secondary infections, especially among those with weakened immune systems such as the elderly, the very young or the sick.

Because of the above considerations, Brunswick County is seeking to contract with a firm to perform aerial mosquito adulticide applications, on an as-needed basis in the aftermath of a disaster.

3. SCOPE OF WORK

Brunswick County has established the following objectives for this project. Any changes to the specifications or Scope of Work will be made in the form of an Addendum to this Request for Proposals and will be supplied to all prospective contractors and posted on the Brunswick County website. Brunswick County may negotiate and refine the final Scope of Work with the selected contractor. Brunswick County reserves the right to negotiate additional services with the selected contractor at any time after the initial contract award.
