

SUPPLEMENTARY FIGURE 2. Estimated cumulative numbers of cases attributed* to SARS-CoV-2 Omicron lineages, by week since the variant proportion estimate reached 1% — United States, January 2, 2022–May 13, 2023

* Variant proportion estimates are reported on COVID Data Tracker (<https://covid.cdc.gov/covid-data-tracker/#variant-proportions>). Numbers of COVID-19 cases attributable to variants were estimated by multiplying the variant proportions by weekly numbers of positive nucleic acid amplification tests from COVID-19 electronic laboratory reporting. <https://healthdata.gov/dataset/COVID-19-Diagnostic-Laboratory-Testing-PCR-Testing/j8mb-icvb>
