Supplemental Material, Table S1	4
Supplemental Material, Figure S1	5
Supplemental Material, Figure S2	6
Supplemental Material, Figure S3	8
Supplemental Material, Figure S4	9

Supplemental Material, Table S1. Influential centers (DFBETAS value more than one) in meta-analyses.

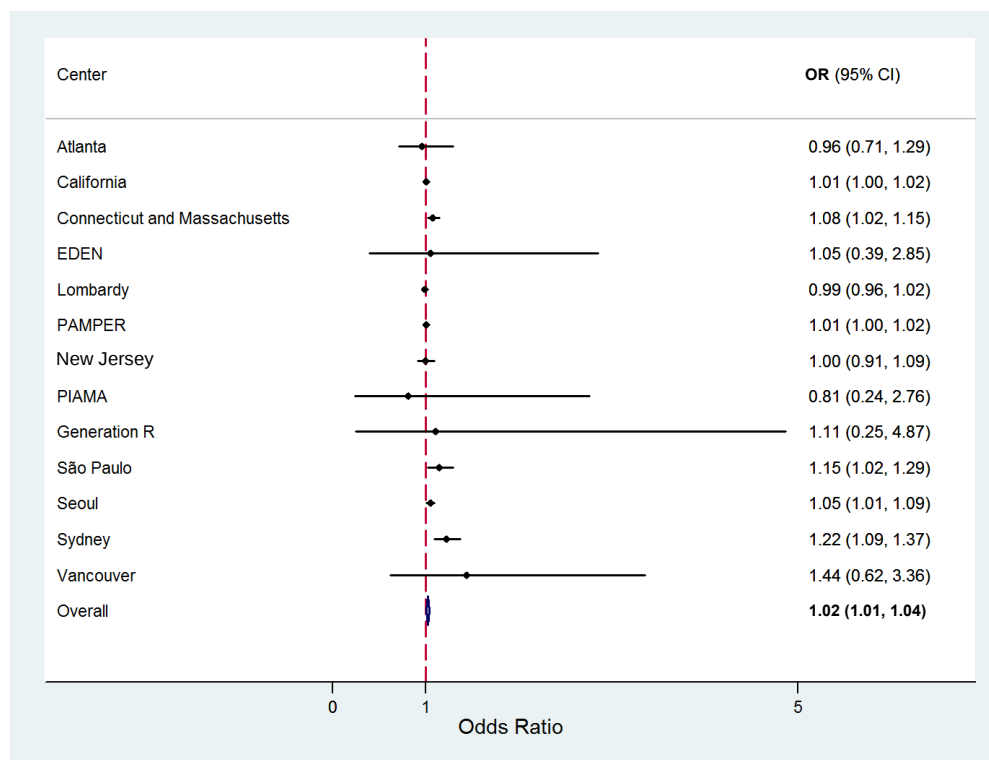

Meta-analysis	Influential Centers
PM₁₀-Term LBW Association	
<i>Unadjusted</i>	
All studies (Random effect model)	Connecticut & Massachusetts
<i>Adjusted for maternal socioeconomic status</i>	
All studies (Random effects model)	California, Seoul
Trimester 1 (Fixed-effect model)	PAMPER
Trimester 1 (Random effects model)	Lombardy, PAMPER
Trimester 2 (Fixed-effect model)	-
Trimester 3 (Fixed-effect model)	-
Trimester 3 (Random effects model)	Lombardy
<i>Adjusted for maternal socioeconomic status and center-specific covariates</i>	
All studies (Random effects model)	California, PAMPER, Sydney
PM₁₀-Term Birth Weight Association	
<i>Unadjusted</i>	
All studies (Random effect model)	Atlanta
<i>Adjusted for maternal socioeconomic status</i>	
All studies (Random effects model)	Atlanta, Lombardy, Sydney
<i>Adjusted for maternal socioeconomic status and center-specific covariates</i>	
All studies (Random effects model)	Lombardy, Sydney
PM_{2.5}-Term LBW Association	
<i>Unadjusted</i>	
All studies (Random effect model)	Connecticut and Massachusetts, Seattle
<i>Adjusted for maternal socioeconomic status</i>	
All studies (Random effects model)	California, Connecticut and Massachusetts, Seattle
<i>Adjusted for maternal socioeconomic status and center-specific covariates</i>	
All studies (Random effects model)	Seattle

Supplemental Material, Figure S1. Forest plot for the random effects meta-analysis of the unadjusted (A) and adjusted^a (B) odds ratios of term LBW in association with a 10- $\mu\text{g}/\text{m}^3$ increase in maternal PM₁₀ exposure during the entire pregnancy.

A)

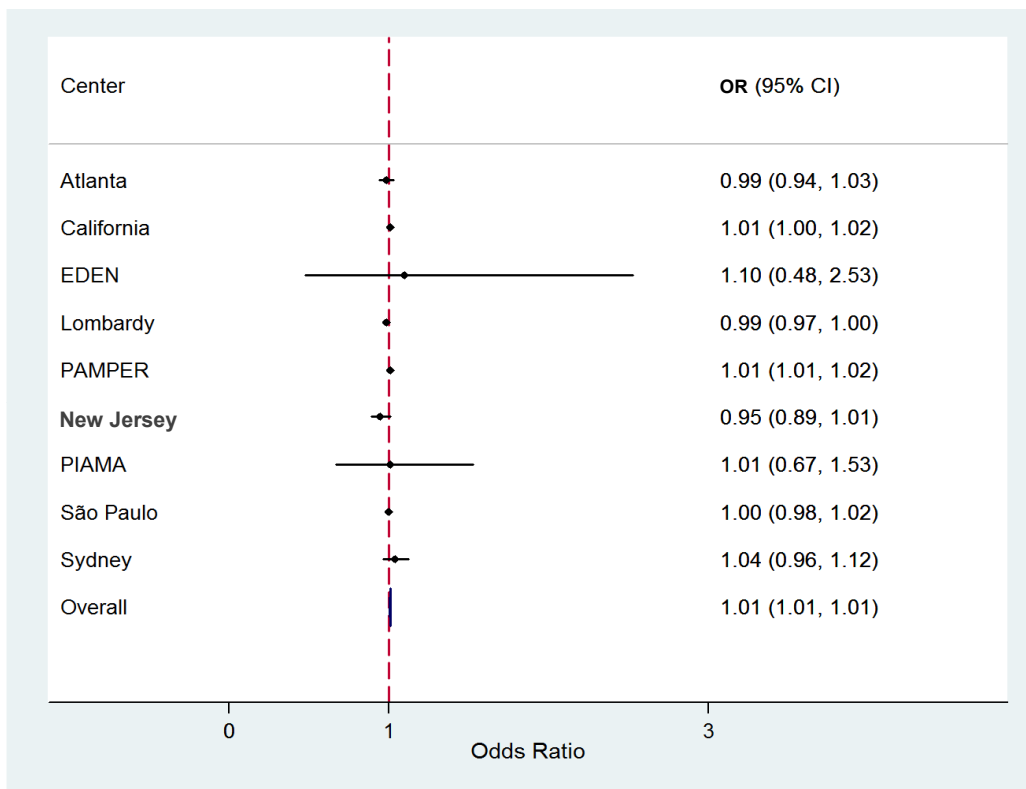

B)

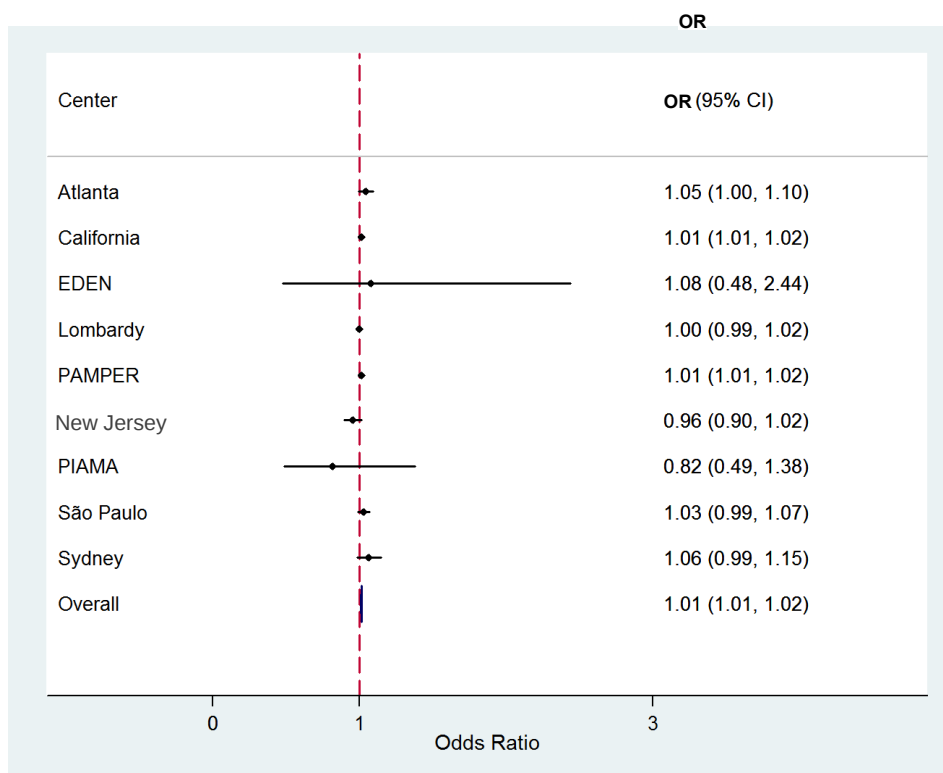

^a Adjusted for maternal socioeconomic status and centre-specific covariates.

Supplemental Material, Figure S2. Forest plot for the fixed-effect meta-analysis of odds ratio (95% confidence interval) of term LBW in association with a 10- $\mu\text{g}/\text{m}^3$ increase in maternal PM₁₀ exposure during the first (A), second (B), and third (C) trimester adjusted for maternal socioeconomic status.

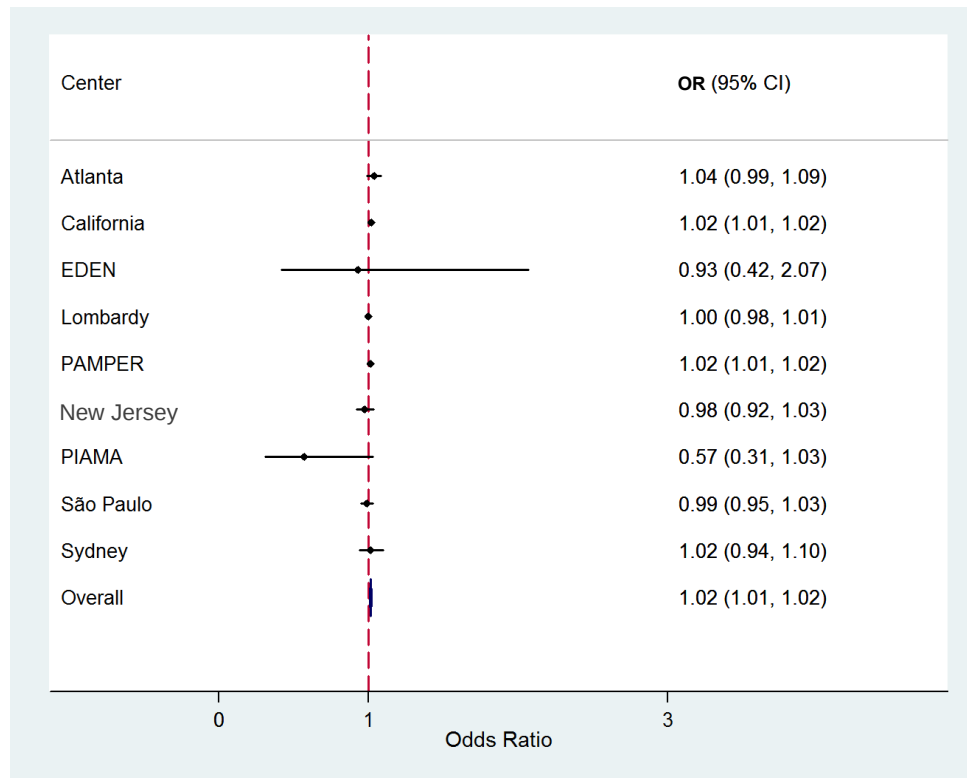

A)

B)

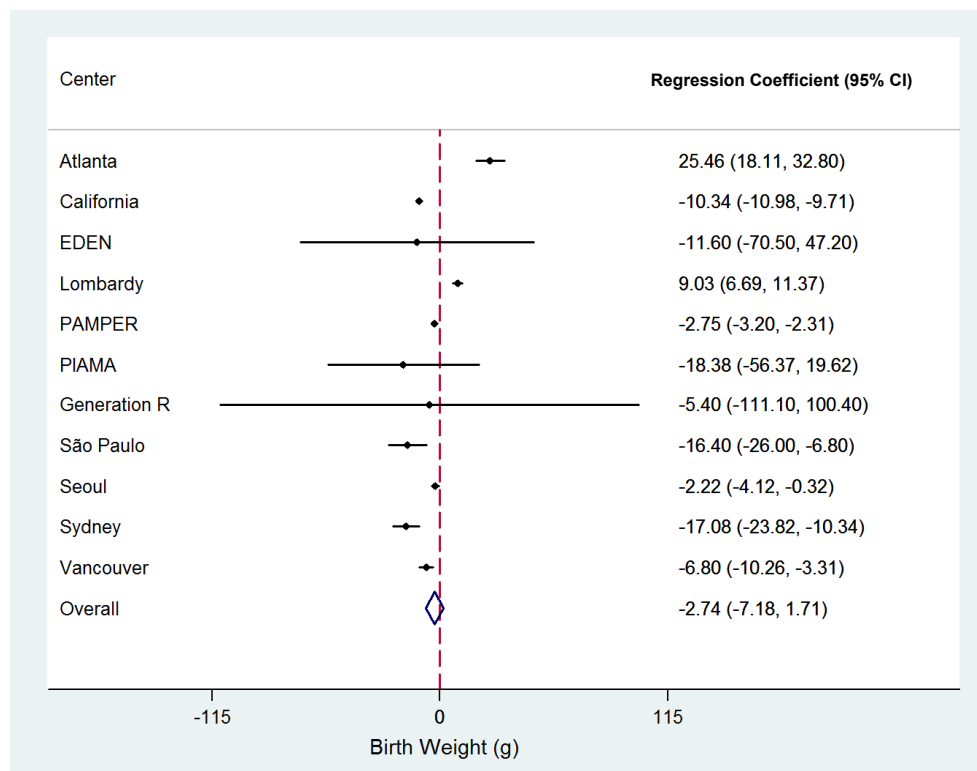

c)

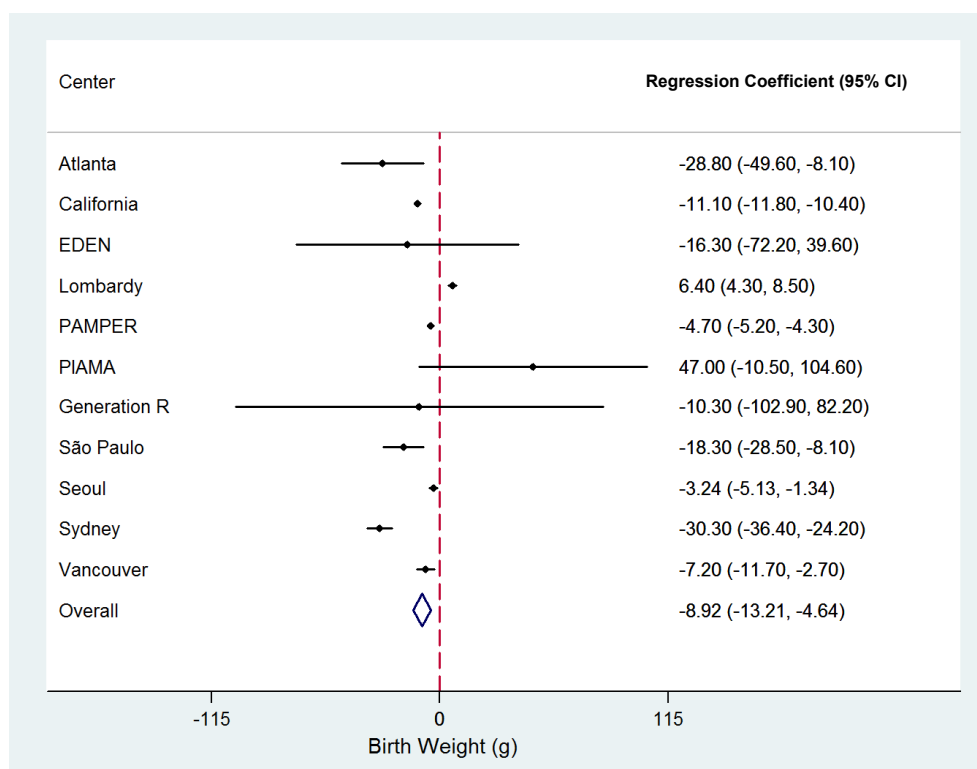

Supplemental Material, Figure S3. Forest plot for the random effects meta-analysis of the unadjusted (A) and adjusted^a (B) change in birth weight (mean difference (95% confidence interval)) in association with a 10- $\mu\text{g}/\text{m}^3$ increase in maternal PM₁₀ exposure during the entire pregnancy.

A)

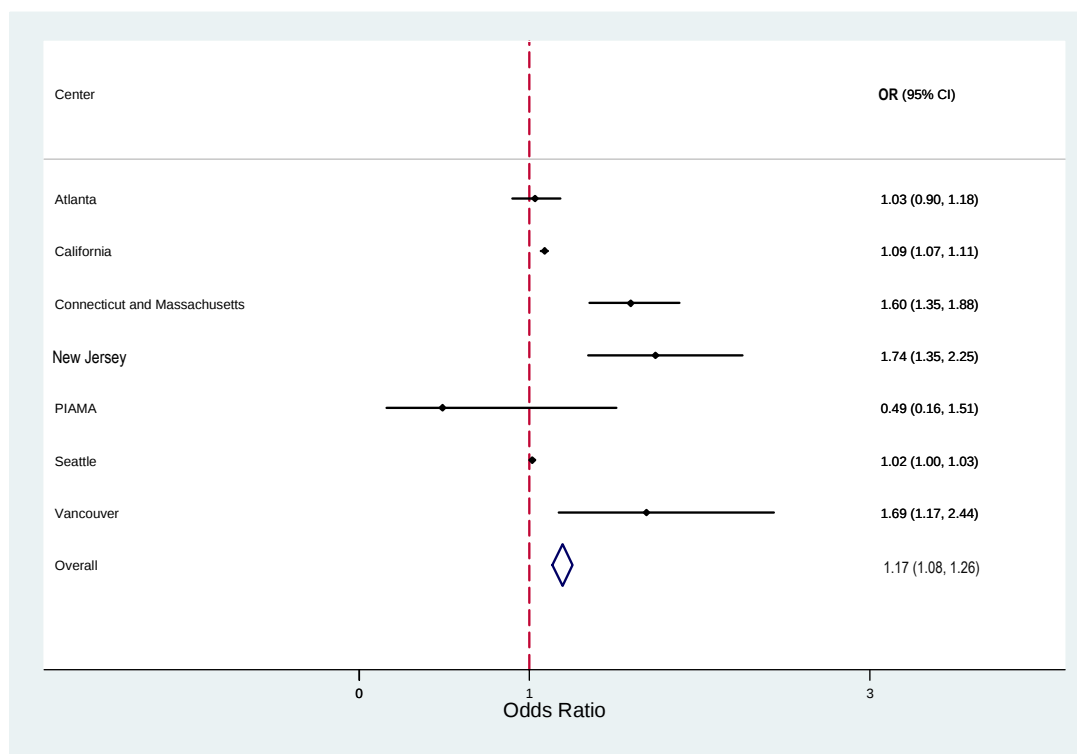

B)

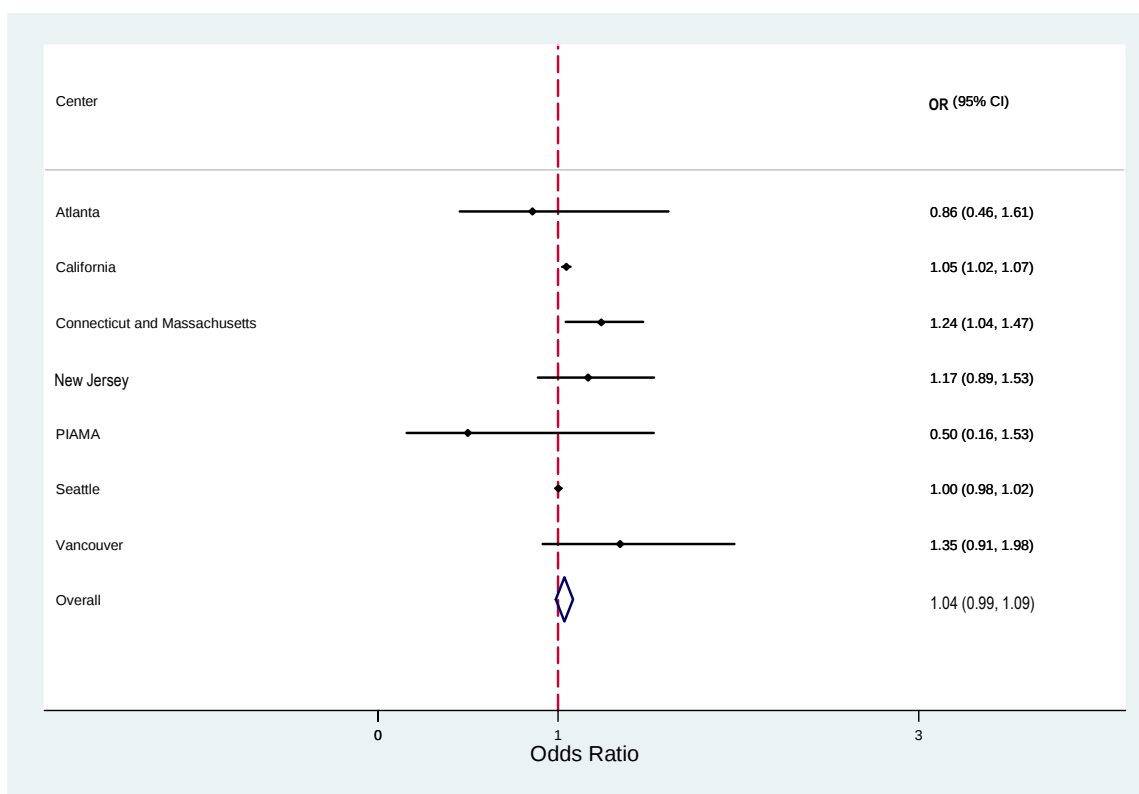

^a Adjusted for maternal socioeconomic status and centre-specific covariates.

Supplemental Material, Figure S4. Forest plot for the random effects meta-analysis of the unadjusted (A) and adjusted^a (B) odds ratios of term LBW in association with a 10- $\mu\text{g}/\text{m}^3$ increase in maternal $\text{PM}_{2.5}$ exposure during the entire pregnancy.

A)

B)

^a Adjusted for maternal socioeconomic status and centre-specific covariates.
