

**SUPPLEMENTARY FIGURE. Change in percentage of kindergartners who are fully vaccinated with measles, mumps, and rubella vaccine (A), diphtheria, tetanus, and acellular pertussis vaccine (B), poliovirus vaccine (C), and varicella vaccine (D) by state — United States\*, 2021-22 to 2022-23 school years**

**Abbreviations:** DTaP = diphtheria, tetanus, and acellular pertussis vaccine; MMR = measles, mumps, and rubella vaccine.

\* Montana did not report kindergarten vaccination coverage for the 2021–22 or 2022-23 school years and is excluded from this analysis. Utah changed the way data were reported between the 2021-22 and 2022-23 school years and is excluded from this analysis.
