

Division of Laboratory Systems

CDC Update

Collette Fitzgerald, PhD
Deputy Director for Science
Division of Laboratory Systems
Center for Laboratory Systems and Response

CLIAC Fall Meeting 2023

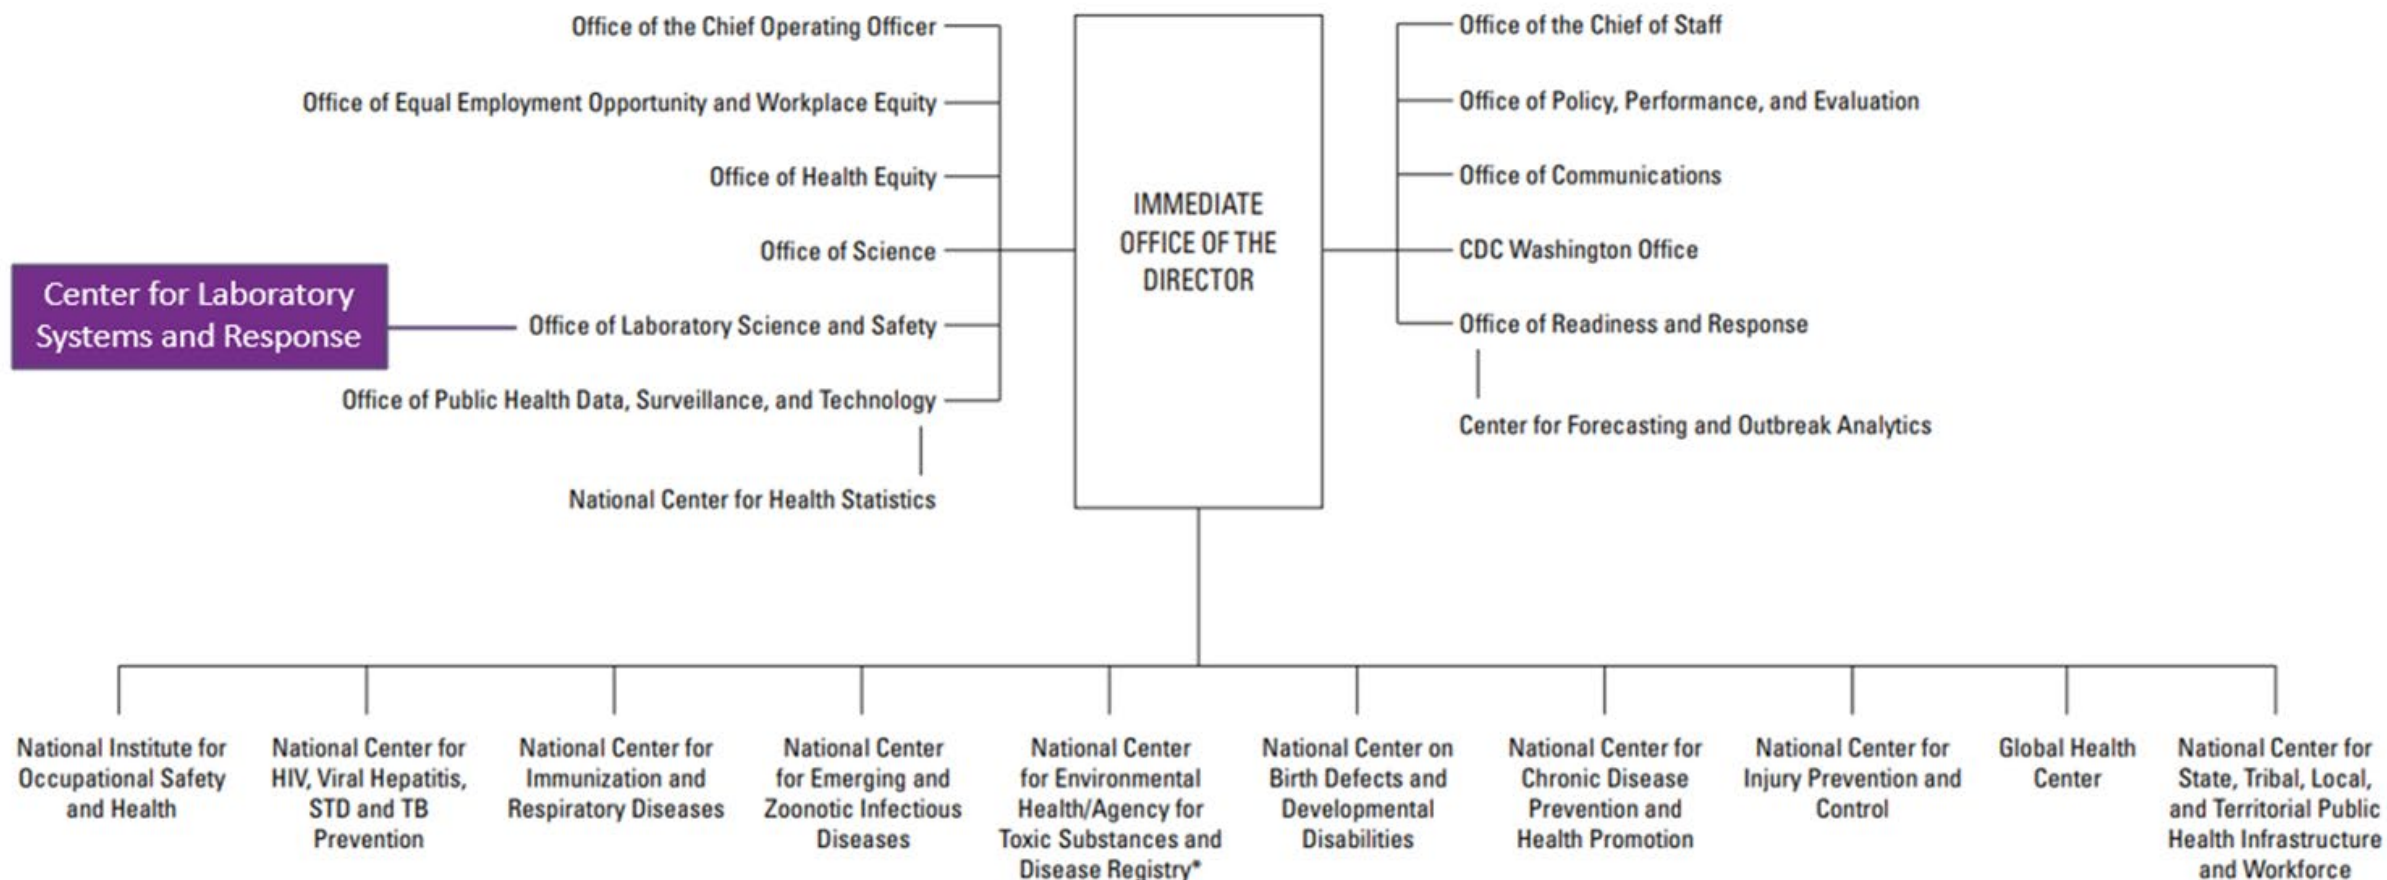

CDC MOVING FORWARD

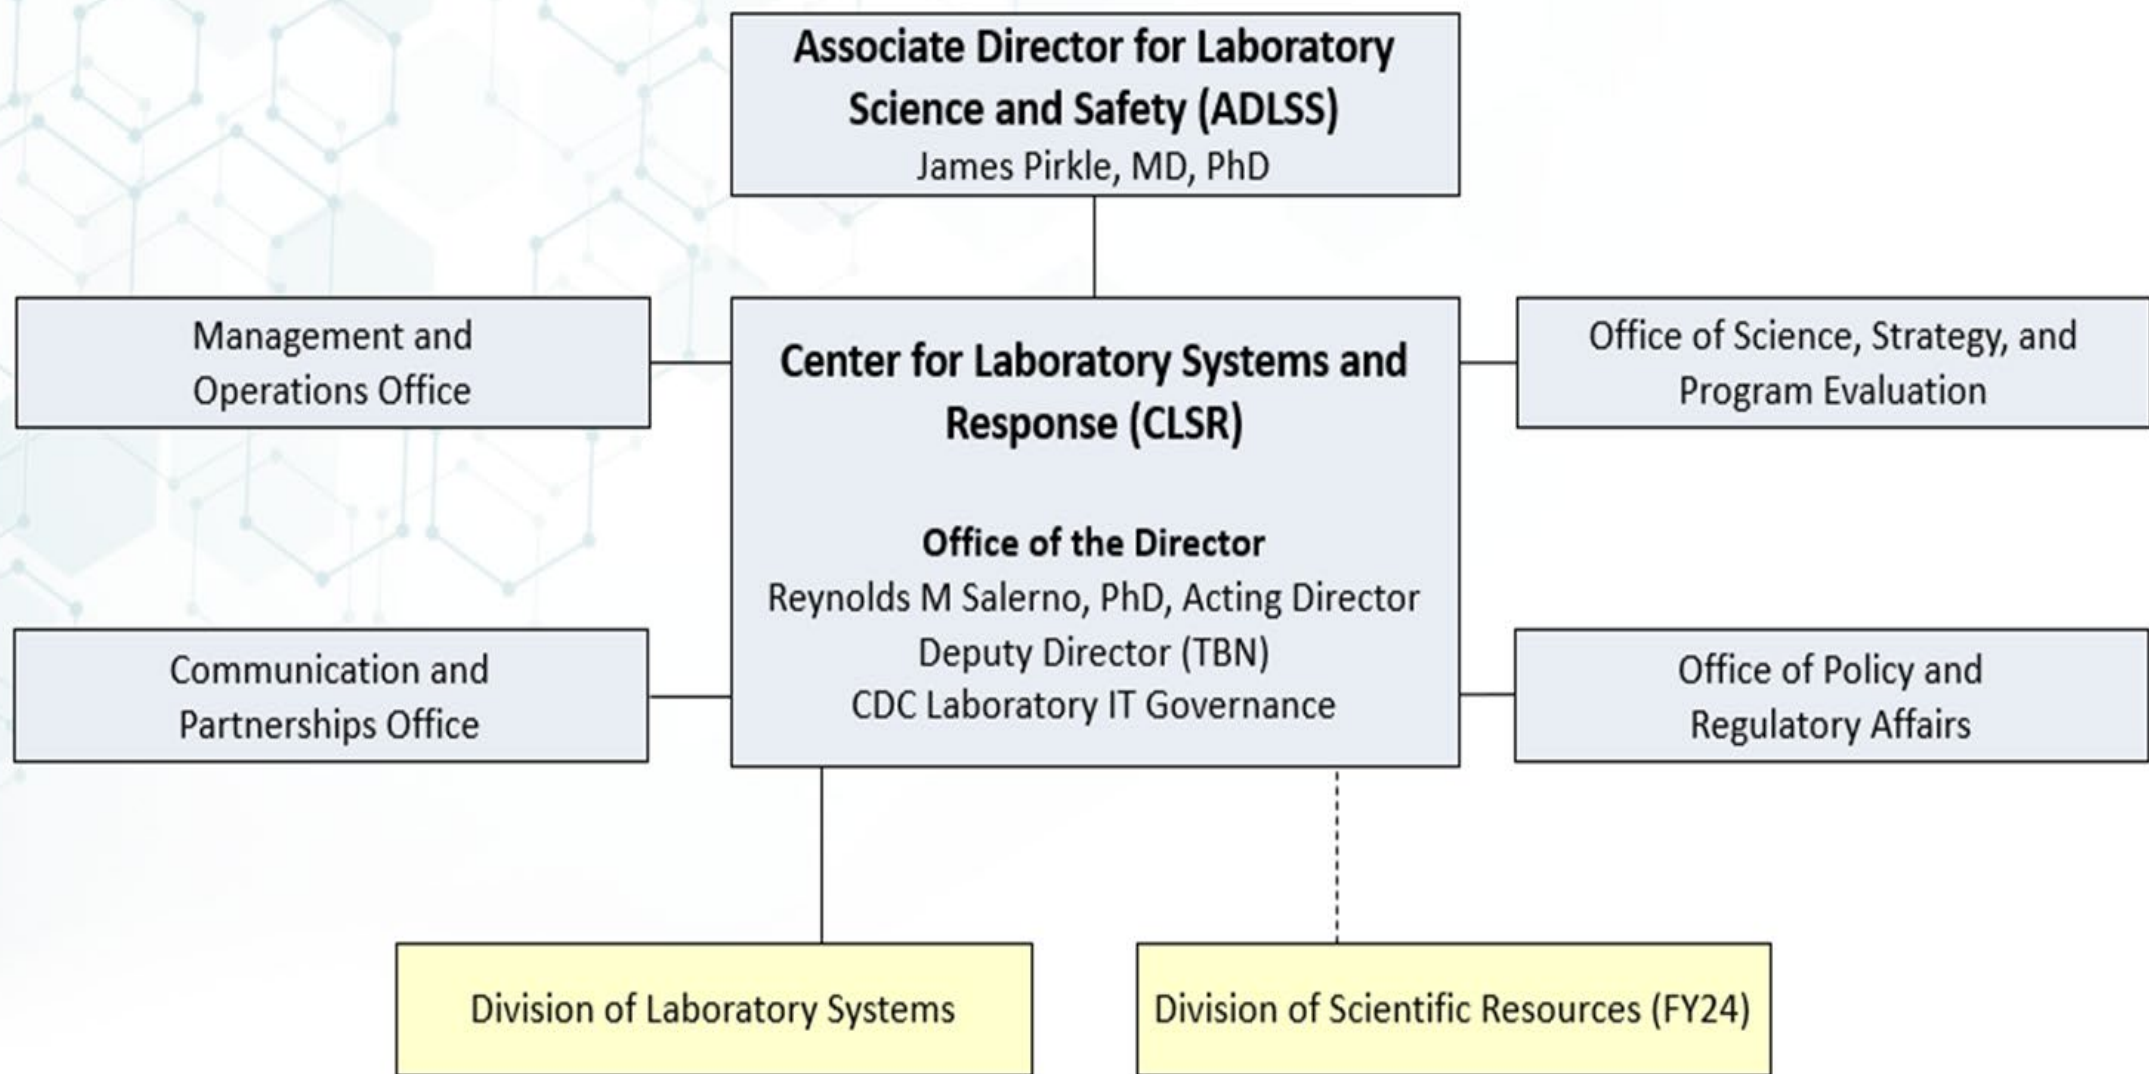

Department of Health and Human Services Centers for Disease Control and Prevention (CDC)

Last updated February 23, 2023

*ATSDR is an OPDIV within DHHS but is managed by a common director's office.

CDC Director's Focus Areas

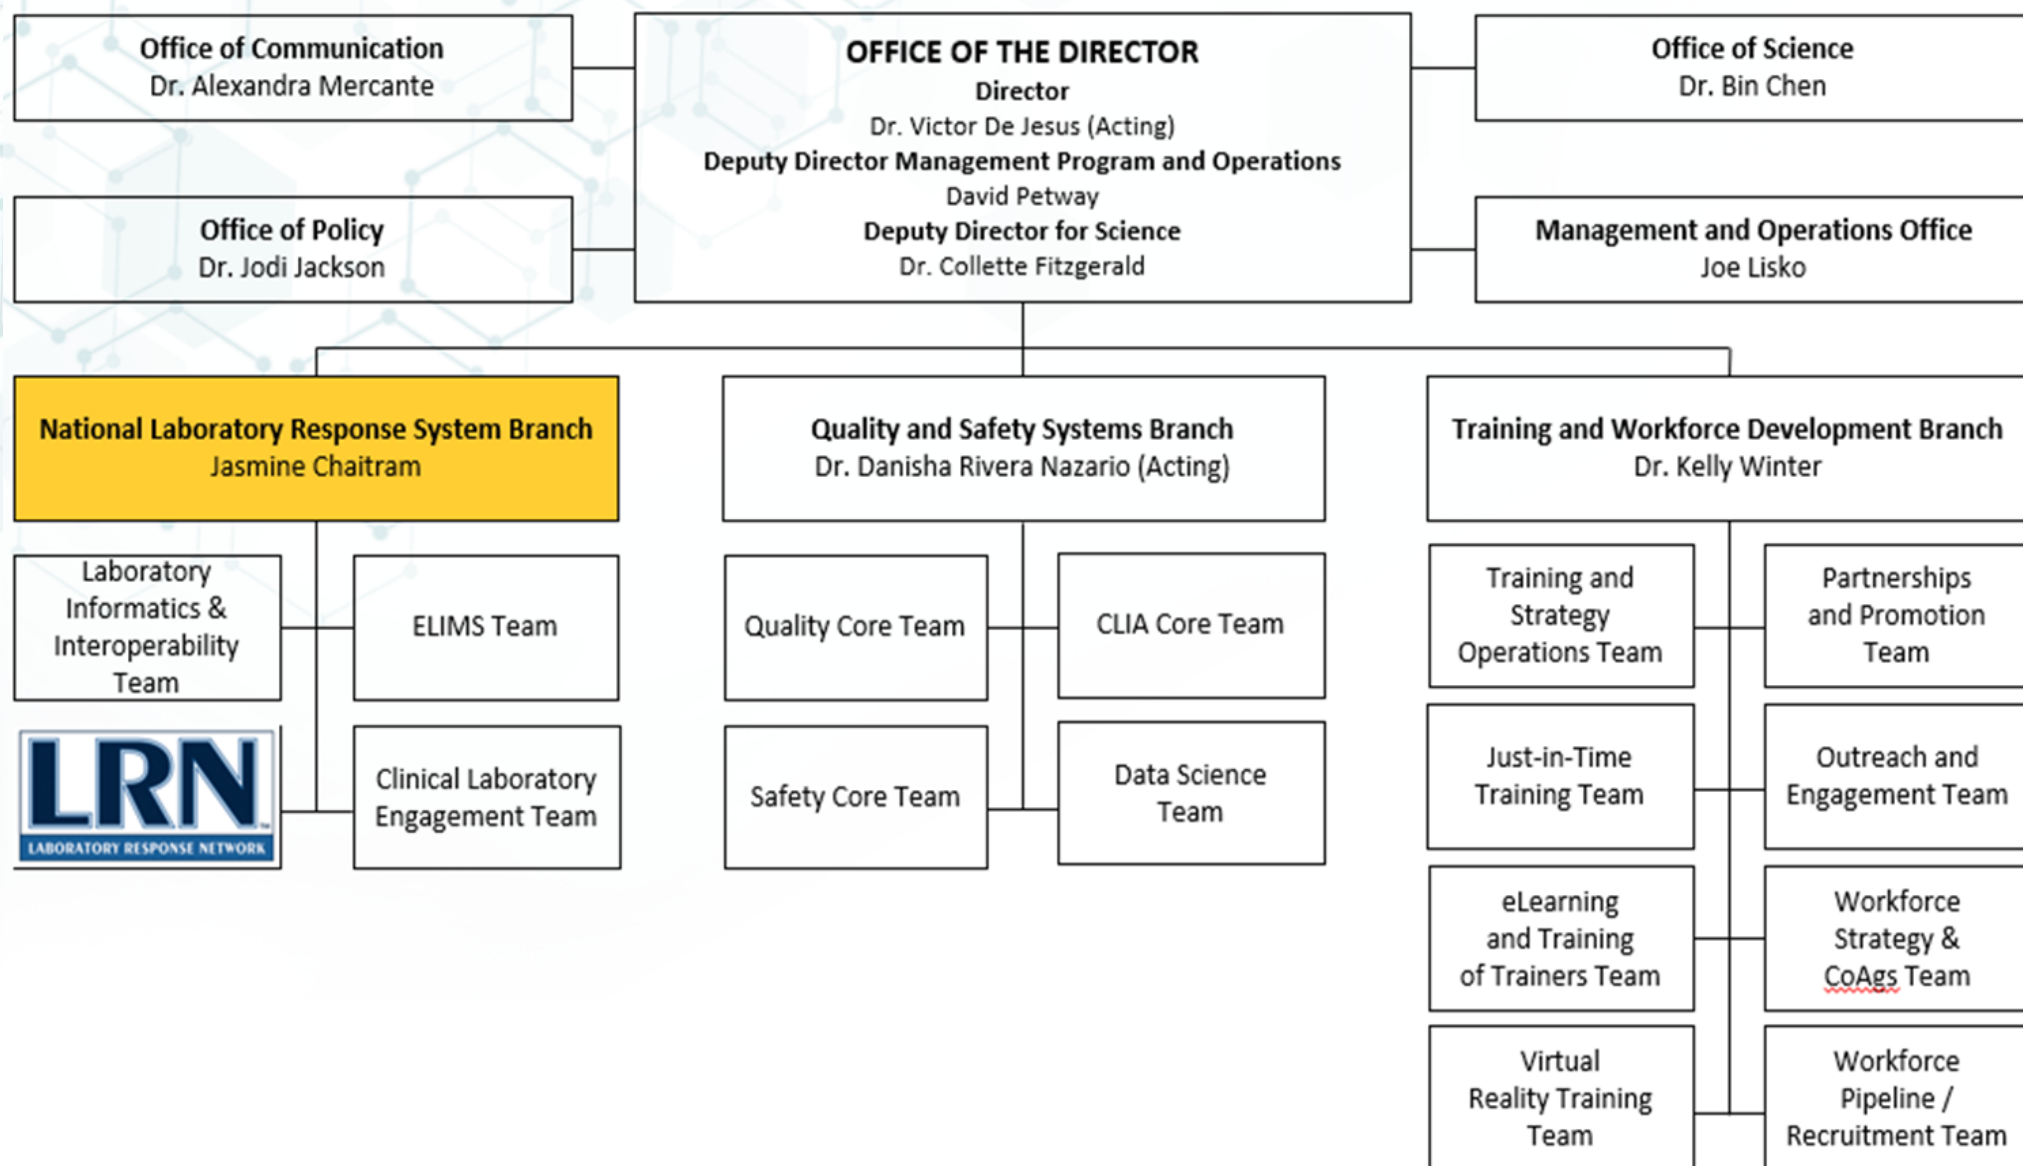

- Identifying and responding to public health threats, including preparing for outbreaks of respiratory viruses (e.g., COVID-19, influenza, RSV)
- Addressing addiction and mental health
- Improving the health of young families, focusing on women's reproductive health, maternal health, and child health

LABORATORY PREPAREDNESS AND RESPONSE

Request for Information (RFI): Public-Private Partnerships to Support Surge Testing

- **Background:** To improve efficiency of large volume testing prior to and during emergency testing
- **Purpose:** To ascertain the level of interest of private sector laboratories to inform and establish pre-event collaborations
- **Objective:** To understand the type of support, cost, and resources needed to provide test development support and surge diagnostic testing prior to and during a PHE.
 - Determine best methods to execute these arrangements

- RFI QR Code for more detailed information and requirements

Open Dates:
Oct. 10 – Nov. 3, 2023

Request for Information (RFI): Public-Private Partnerships to Support Test Development and Production

- **Background:** To improve efficiency of rapid test development, technology transfer, and validation prior to a public health emergency, and to enable rapid test manufacture during a response.
- **Purpose:** To ascertain the level of interest of private sector test developers to inform and establish pre-event collaborations
- **Objective:** To understand the type of support, cost, and resources needed to enhance diagnostic test production capacity prior to and during a PHE.

RFI QR Code for more detailed information and requirements

Open Dates:
Oct. 31 – Nov. 15, 2023

LABORATORY QUALITY AND SAFETY

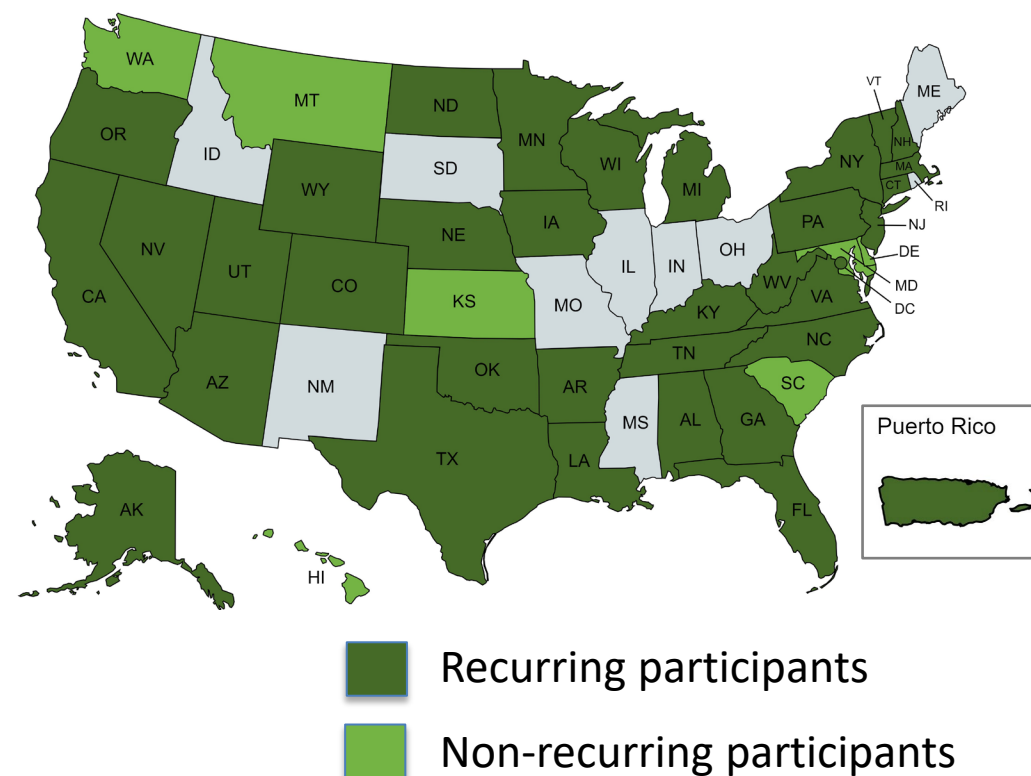

ECHO Biosafety Program

- **Ten** ECHO sessions have been conducted since January 2023
- Discussion topics include
 - Decontamination of Laboratory Equipment
 - PPE Use (What, Who, Why, When, and How)
 - Laboratory Acquired Infections
 - Biosafety Challenges in Alaska
 - Safety Challenges with Specimen Collection, Transport, Accessioning, and Storage
 - Quality in Biosafety

www.cdc.gov/safelabs/resources-tools/echo-biosafety.html

Organization Affiliation by State – Jan. to Sept. 2023

CDC International Symposium on Biosafety

March 10-14, 2024

Crowne Plaza Ravinia, Atlanta, GA

The symposium will provide sessions about modernizing biosafety operations and practices, focused on the areas of Clinical Care, Public Health, Research, and Animal Care

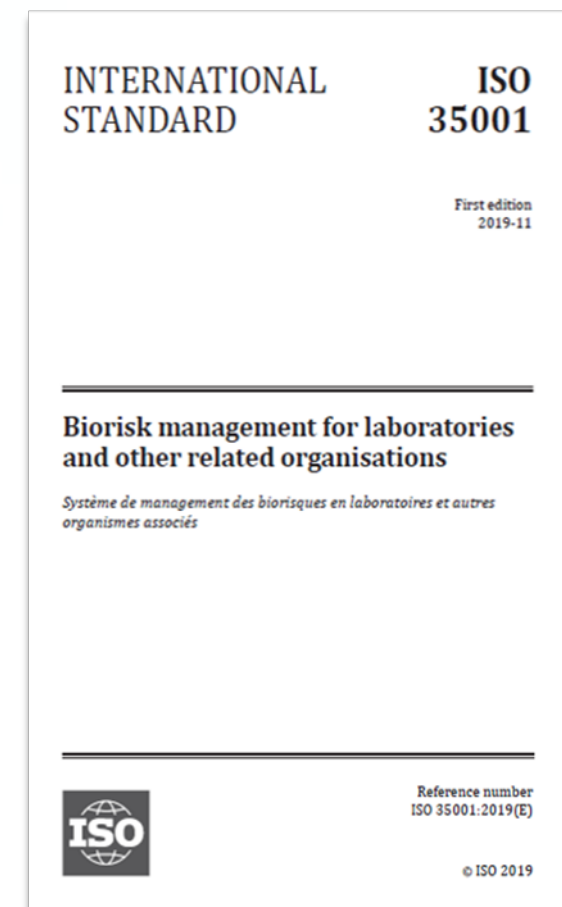

<https://www.eagleson.org/conferences/cdc-international-biosafety-symposium/>

Implementation of ISO 35001:2019

Purpose: Develop a strategy, provide guidance, and support the implementation and use of a biorisk management system in accordance with ISO 35001:2019

Results to Date: Two PHLs (New Hampshire, Virginia) have completed a one-year pilot study to implement ISO 35001 in their laboratories

Impact: Implementation of ISO 35001 helps facilities improve their internal processes to reduce incidents, accidents, infections, and illnesses that may result from laboratory operations

Million Hearts Collaboration

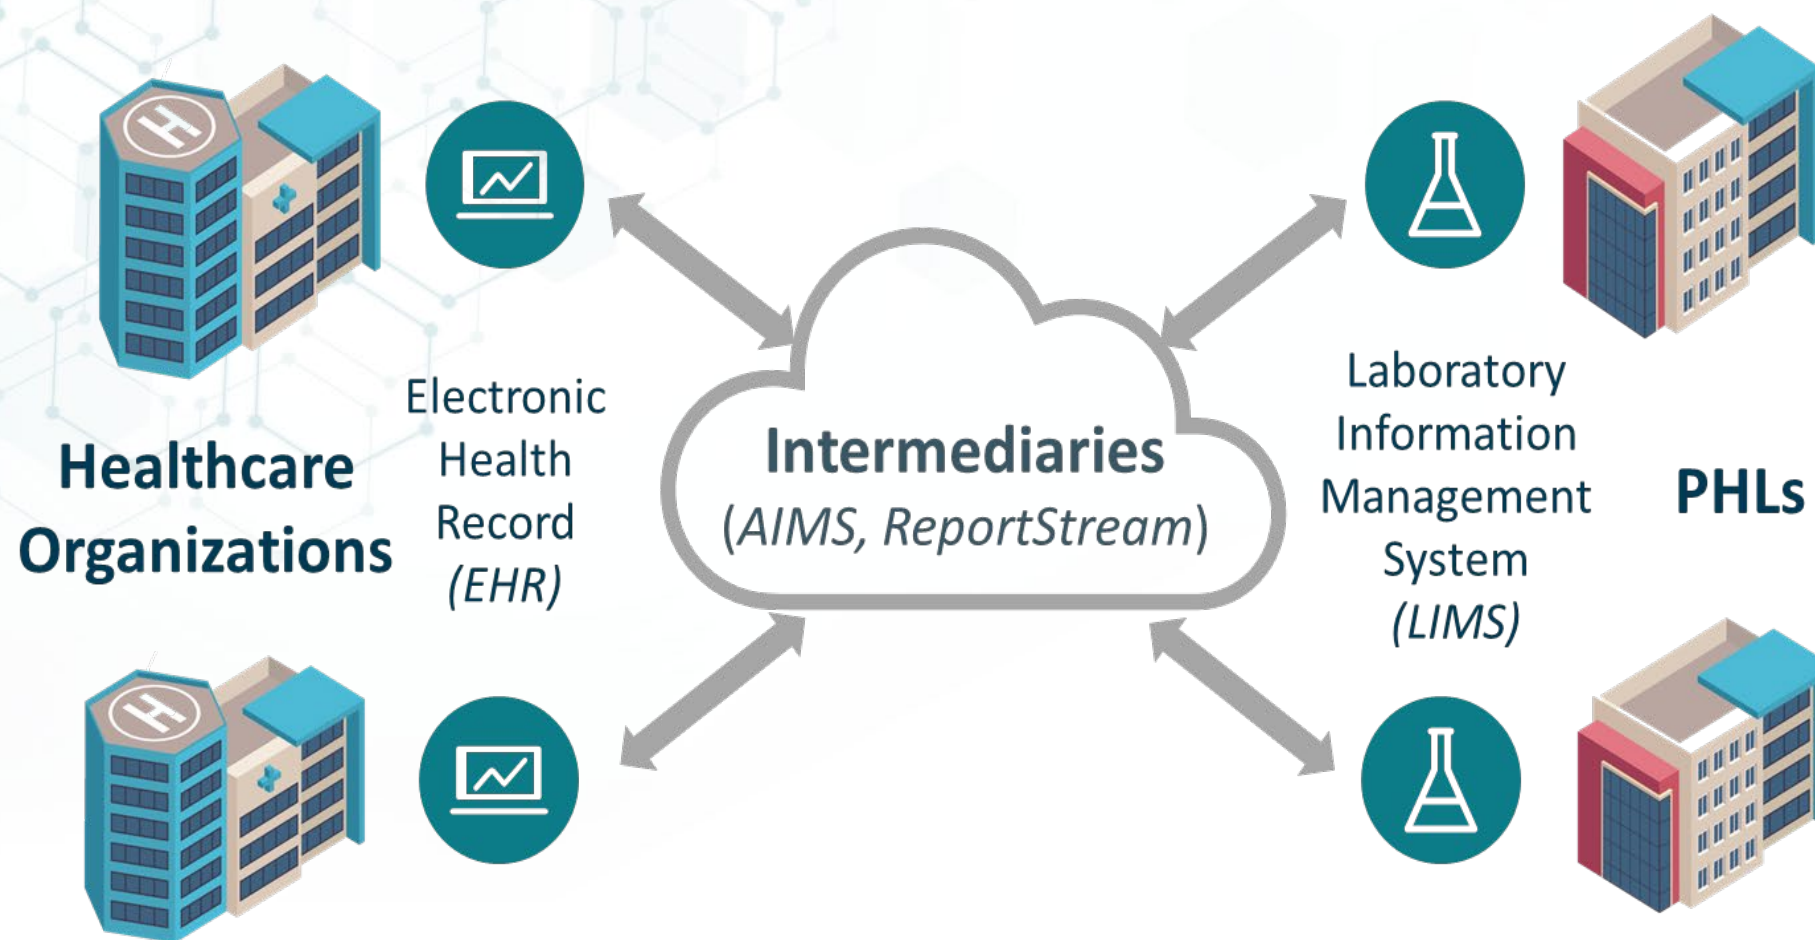

Cardiovascular Disease Risk Reduction in a Medically Underserved Population

- Collaborating with a federally qualified health center and a major clinical reference laboratory to develop messaging to patients and healthcare providers about hypercholesterolemia to prompt appropriate diagnoses and follow-up using lab reports, patient portals, and public service announcements
- Evaluating processes, outcomes, and challenges within a medically underserved community, commencing in 2024
- Partnering with CDC Division of Heart Disease and Stroke Prevention, National Association of Community Health Centers, and the Million Hearts Initiative™

LABORATORY INFORMATICS

Public Health Laboratory (PHL) Electronic Test Orders and Results (ETOR) Initiative

<https://www.cdc.gov/csels/dls/public-health-laboratory-etor.html>

Enterprise Laboratory Information Management System (ELIMS)

CDC ELIMS has Electronic Laboratory Reporting (ELR) functionality to send results directly to State Partners

- 26 CDC laboratories are “live” with HL7 ELR
- ELIMS sends ELR to 15 states, and an additional 6 are in progress

United States Core Data for Interoperability (USCDI)

- ONC's USCDI is a standardized set of health data classes and elements for exchanging health information across the United States
- USCDI is an important policy to improve Laboratory Data Interoperability
- DLS collaborates with CDC programs to submit laboratory data elements to USCDI

<https://www.healthit.gov/isa/united-states-core-data-interoperability-uscdi>

LABORATORY TRAINING AND WORKFORCE DEVELOPMENT

OneLab Is The Story of Growth

OneLab experienced **290% membership** growth in FY23, now totaling over **12,000 unique members!**

OneLab **Resources**

- OneLab live events draw in over **400 attendees** on average, and the materials have been downloaded over **8,900 times**
- OneLab training materials – eLearning and VR courses, job aids, webinars, videos, etc. – attracted over **171,000 registrations** in FY23

OneLab **REACH™**

11,000+ learners with an average of over **800 new learners** per month

OneLab **Network**

6,000+ members with an average of over **280 new members** per month

OneLab **TEST**

2,000+ members with an average of over **400 new members** per month

New Training Courses on OneLab REACH™

Register for our new courses on [OneLab REACH!](#)

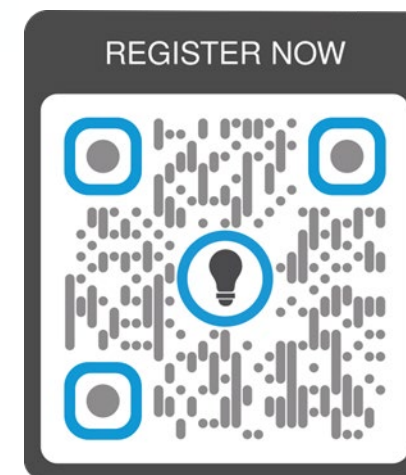

Fundamentals of Methylene Chloride Safety

P.A.C.E.® credit, 1 Hour(s)

Fundamentals of Laboratory Safety

P.A.C.E.® credit, 1.5 Hour(s)

Fundamentals of Communicating the Hazards of Laboratory Chemicals

P.A.C.E.® credit, 1 Hour(s)

OneLab VR Release

First on-demand training scenario launched in October: Packing and Shipping Dangerous Goods

Updates to virtual laboratory: Multiplayer with voice chat, intuitive wrist menu, accessibility features for individuals with disabilities

Explore [OneLab VR](#)

To suggest training topics or apply for VR dissemination program, email vr@cdc.gov.

Rescheduled: OneLab Summit moved to April 2024

Registration is open for the next [OneLab Summit](#)!

New dates: April 16-18, 2024

Thrive: People, Planning, Preparedness

OneLab Summit is a free, annual virtual event that connects laboratory professionals in real time to support a unified response to laboratory education and training needs

OneLab Summit attendees will

- Increase their knowledge of laboratory training development tools and practices
- Gain insights from the clinical and public health laboratory community's success and resilience
- Collaborate and connect with CDC and laboratory education and training peers

PARTNERSHIP, COMMUNICATION, AND OUTREACH

Clinical Laboratory Partners Forum

Recent Meeting in September 2023

- Discussed the laboratory's role in addressing health equity challenges
- Presentations from CDC, ASCP, and CAP

Discussion Questions:

- What programs are in place in your organizations to achieve health equity?
- How can we work together to achieve desired health equity goals?

<http://www.cdc.gov/csels/dls/strengthening-clinical-labs/clin-lab-partners-forum.html>
