Child COVID-19 Vaccination Coverage

COVID-19 vaccination coverage for [children](#) 6 months through 17 years is based on data from CDC's National Immunization Survey–Child COVID Module. Estimates of vaccination coverage are based on parental report.

- As of November 4, 2023, 4.9% (95% Confidence Interval: 3.6%-6.1%) of children were reported to have received the 2023-24 COVID-19 vaccine.
- An additional 18.9% (16.2%-21.6%) of children had a parent who reported they definitely planned to get their child vaccinated.
- Reported receipt of the COVID-19 vaccine is low among children across all age and race and ethnicity groups.
- Additional COVID-19 vaccination data for children by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).

All Adults Coverage

Data and Charts for All Adults Coverage >

Adult COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates among all [adults 18 years and older](#) are based on data from CDC's National Immunization Survey-Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of November 4, 2023, 13.9% (95% Confidence Interval: 12.8%-15.0%) of adults reported having received an updated 2023-24 COVID-19 vaccine since September 14, 2023.
- An additional 18.1% (16.7%-19.5%) reported that they definitely plan to get vaccinated.
- Vaccination coverage increased by age and was highest among adults 65 years and older [30.4%, (26.9%-33.9%)].
- Vaccination coverage ranged from 2.3% (0.4%-4.2%) among Pacific Islander and Native Hawaiian adults to 17.6% (16.1%-19.2%) among non-Hispanic White adults.
- Vaccination coverage was lower among adults residing in rural areas [10.2% (8.0%-12.4%)] than among those living in urban [14.8% (12.7%-17.0%)] and suburban [14.3% (12.8%-15.8%)] areas.
- Vaccination coverage was higher among insured adults [15.3% (14.1%-16.6%)] than uninsured adults [3.7% (2.1%-5.3%)].
- Across jurisdictions, vaccination coverage ranged from 1.9% (0.7%-3.1%) in the U.S. Virgin Islands to 35.6% (20.1%-51.1%) in Vermont.
- Additional COVID-19 vaccination data for adults by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).

Pregnant Persons Coverage

Data and Charts for Pregnant Persons Coverage >

Pregnant Persons COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates for [pregnant persons](#) 18 to 49 years are based on data from CDC’s [Vaccine Safety Datalink](#). Estimates of vaccination coverage are based on electronic health data from multiple integrated health systems.

- As of November 4, 2023, 6.2% of pregnant persons received the updated 2023-24 COVID-19 vaccine.
- Vaccination coverage was highest among non-Hispanic Asian (10.3%) pregnant persons and lowest among non-Hispanic Black (1.7%) pregnant persons.
- Additional COVID-19 vaccination data for pregnant persons are available: [Coverage by Population: Pregnant Women](#).
