

National Wastewater Surveillance System (NWSS)

National Wastewater Surveillance System (NWSS)

Updated November 29, 2023

Wastewater (sewage) can be tested to detect traces of infectious diseases circulating in a community, even if people don't have symptoms. You can use these data as an early warning that levels of infections may be increasing or decreasing in your community.

[About CDC's Wastewater Program \(NWSS\)](#)

Wastewater Monitoring Data

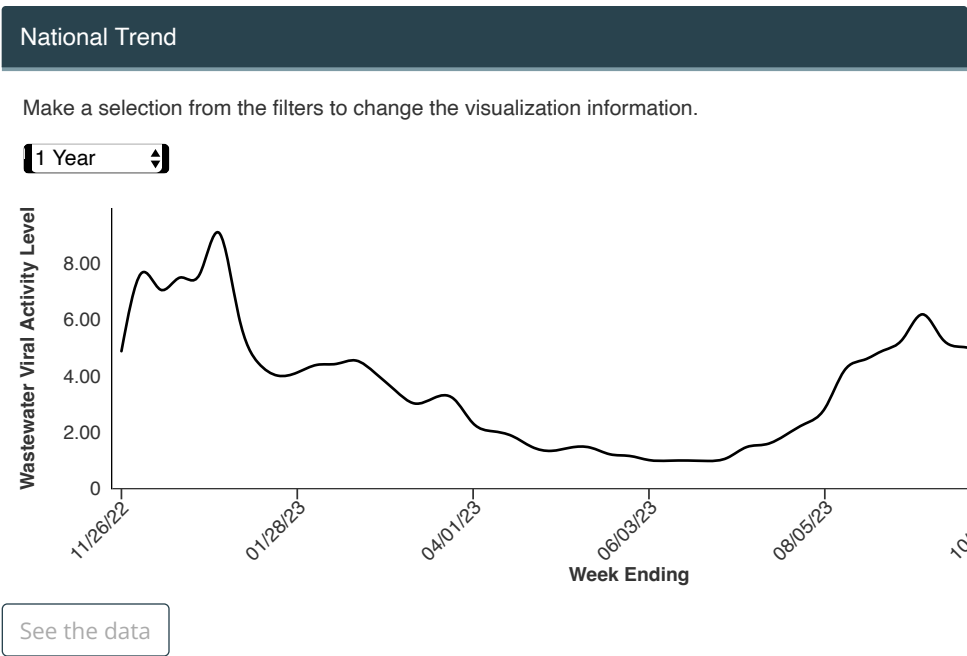

CDC's National Wastewater Surveillance System (NWSS) program collects and displays wastewater data from communities across the United States.

- [COVID-19](#)
- [MPOX](#)

Nationally, the wastewater viral activity level for COVID-19 is currently **High**.

Very High High Moderate Low Minimal

[See the data](#)

Most communities are reporting **no detection** of mpox in wastewater.

- Consistent detection** 0 sites (0%)
- Intermittent detection** 5 sites (1%)
- No detection** 207 sites (33%)
- No recent data** 417 sites (66%)
