Map Packages

Do you need to share your map and the data associated with it, with someone who doesn't have access to the folder where the information is stored? You can easily do this by using the ArcMap Feature called Map Package.

In ArcMap, go to File -> Share As -> Map Package.

You MUST fill out the Item Description or the package will not save. Once you complete the filling out the required information, click on 'Analyze', located at the top of the Map Package dialogue box. If the package is successfully analyzed, click on 'Share'.
