VACCINATION DASHBOARD

## Weekly Respiratory Syncytial Virus (RSV) Vaccination Dashboard

The Weekly RSV Vaccination Dashboard is designed to share weekly RSV vaccination data, including coverage estimates and intent for vaccination, using a variety of data sources including surveys, healthcare claims, electronic medical records, and immunization information systems (IIS) data. The Dashboard will be updated weekly as new data become available. Please [email](#) to share any feedback.

### Data Summary

#### Adults 60+ Coverage

Data and Charts for Adults 60+ Coverage >

#### Adults 60+ RSV Vaccination Coverage

RSV vaccination coverage estimates among [adults 60 years and older](#) are based on data from CDC’s National Immunization Survey-Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of December 2, 2023, an estimated 15.9% (95% Confidence Interval: 14.6%-17.2%) of adults 60 years and older reported having received an RSV vaccine.

- An additional 15.6% (13.3%-18.0%) reported that they definitely plan to get vaccinated.
- White adults had higher vaccination coverage than adults in all other race and ethnicity groups, with coverage ranging from 2.1% (0.0%-4.3%) among Pacific Islander and Native Hawaiian adults to 18.3% (16.6%-19.9%) among non-Hispanic White adults.
- Vaccination coverage has also consistently varied by age, poverty status, health insurance status, urbanicity, and chronic medical condition.
- Across jurisdictions, receipt of an RSV vaccine was lowest in the U.S. Virgin Islands [2.1% (0.9%-3.2%)] and highest in Iowa [34.6% (6.0%-63.3%)].
- Additional RSV vaccination data by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).

## Pregnant Persons Coverage
