Maps

United States COVID-19 Hospitalizations, Deaths, Emergency Department (ED) Visits, and Test Positivity by Geographic Area

Maps, charts, and data provided by CDC, updates weekly for the previous MMWR week (Sunday-Saturday) on Friday by 8 pm ET

View Footnotes and Download Data

COVID-19 HOSPITAL ADMISSIONS (PAST WEEK)	% CHANGE IN COVID-19 HOSPITAL ADMISSIONS	COVID-19 HOSPITAL ADMISSIONS PER 100,000 (PAST WEEK)
23,432	3.1%	7.06

CDC | Data through: November 9, 2022; Posted: December 15, 2022

View:
- Hospitalizations
- Deaths
- Emergency Department Visits
- Test Positivity

Metric:
- COVID-19 new hospital admissions
- Inpatient beds occupied by COVID-19 patients
- ICU beds occupied by COVID-19 patients

Scale:
- County
- State

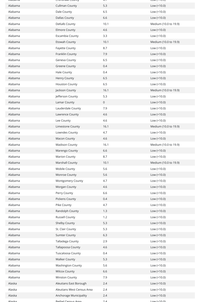
Time period:
- Past Week

Measure:
- Count
- Rate per 100,000
- Change from prior week

COVID-19 hospital admissions levels in U.S. by county
Shown as rate (7-day admissions per 100,000 population)

Time Period: May COVID-19 hospital admissions per 100,000 population (7-day total) are calculated using data from the MMWR week ending on May 14, 2022.
Data Source: COVID-19 Community Profile Report

Reported COVID-19 New Hospital Admissions Rate per 100,000 Population in the Past Week, by County - United States



New COVID-19 hospital admissions per 100,000 population, past week (state)

Low (<10) | Medium (10 to <15) | High (≥15) | Insufficient data

Publication info for Emergency Department Visits for Pediatric Healthcare Personnel

- October 27, 2023: Due to a data processing error, reported values for "Percentage of Staffed Inpatient Beds Occupied by COVID-19 Patients in the Past Week, by State/Territory" may have been overestimated and should be interpreted with caution if less than 1%. Therefore, previously reported values for "Percentage of Staffed Inpatient Beds Occupied by COVID-19 Patients in the Past Week, by State/Territory" may have been overestimated and should be interpreted with caution.
- October 20, 2023: Commonwealth of the Northern Mariana Islands (CNMI) – October 29th, 2023: Due to incomplete or missing hospital data received for the October 8th, 2023 through October 14th reporting period, the COVID-19 Hospital Admissions Level data could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on October 20th, 2023.
- October 13, 2023: Commonwealth of the Northern Mariana Islands (CNMI) – October 13th, 2023: Due to incomplete or missing hospital data received for the October 1st, 2023 through October 7th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on October 13th, 2023.
- October 6, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - October 6th, 2023: Due to incomplete or missing hospital data received for the September 24th, 2023 through September 30th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on October 6th, 2023.
- September 29, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - September 29th, 2023: Due to incomplete or missing hospital data received for the September 17th, 2023 through September 23rd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on September 29th, 2023.
- September 25, 2023: American Samoa (AS) - September 29th, 2023: Due to incomplete or missing hospital data received for the September 17th, 2023 through September 23rd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on September 29th, 2023.
- September 25, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - September 25th, 2023: Due to incomplete or missing hospital data received for the September 17th, 2023 through September 23rd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on September 25th, 2023.
- September 18, 2023: American Samoa (AS) - September 18th, 2023: Due to incomplete or missing hospital data received for the September 3rd, 2023 through September 9th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on September 18th, 2023.
- September 11, 2023: American Samoa (AS) - September 11th, 2023: Due to incomplete or missing hospital data received for the August 27th, 2023 through September 2nd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on September 11th, 2023.
- September 11, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - September 11th, 2023: Due to incomplete or missing hospital data received for the August 27th, 2023 through September 2nd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on September 11th, 2023.
- September 5, 2023: American Samoa (AS) -September 5th, 2023: Due to incomplete or missing hospital data received for the August 20th, 2023 through August 26th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on September 5th, 2023.
- September 5, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - September 5th, 2023: Due to incomplete or missing hospital data received for the August 20th, 2023 through August 26th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on September 5th, 2023.
- August 28, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - August 28th, 2023: Due to incomplete or missing hospital data received for the August 13th, 2023 through August 19th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on August 28th, 2023.
- August 23, 2023: American Samoa (AS) - August 28th, 2023: Due to incomplete or missing hospital data received for the August 13th, 2023 through August 19th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on August 28th, 2023.
- August 21, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - August 21st, 2023: Due to incomplete or missing hospital data received for the August 6th, 2023 through August 12th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on August 21st, 2023.
- August 14, 2023: American Samoa (AS) - August 21st, 2023: Due to incomplete or missing hospital data received for the August 6th, 2023 through August 12th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on August 21st, 2023.
- August 14, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - August 14th, 2023: Due to incomplete or missing hospital data received for the July 30th, 2023 through August 5th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on August 14th, 2023.
- August 7, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - August 7th, 2023: Due to incomplete or missing hospital data received for the July 23rd, 2023 through July 29th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on August 7th, 2023.
- August 1, 2023: American Samoa (AS) - August 7th, 2023: Due to incomplete or missing hospital data received for the July 23rd, 2023 through July 29th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on August 7th, 2023.
- July 31, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - July 31st, 2023: Due to incomplete or missing hospital data received for the July 16th, 2023 through July 22nd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on July 31st, 2023.
- July 31, 2023: American Samoa (AS) - July 31st, 2023: Due to incomplete or missing hospital data received for the July 16th, 2023 through July 22nd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on July 31st, 2023.
- July 24, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - July 24th, 2023: Due to incomplete or missing hospital data received for the July 9th, 2023 through July 15th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on July 24th, 2023.
- July 17, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - July 17th, 2023: Due to incomplete or missing hospital data received for the July 2nd, 2023 through July 8th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on July 17th, 2023.
- July 17, 2023: American Samoa (AS) - July 17th, 2023: Due to incomplete or missing hospital data received for the July 2nd, 2023 through July 8th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on July 17th, 2023.
- July 10, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - July 10th, 2023: Due to incomplete or missing hospital data received for the June 25th, 2023 through July 1st reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on July 10th, 2023.
- July 10, 2023: American Samoa (AS) - July 10th, 2023: Due to incomplete or missing hospital data received for the June 25th, 2023 through July 1st reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on July 10th, 2023.
- July 3, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - July 3rd, 2023: Due to incomplete or missing hospital data received for the June 18th, 2023 through June 24th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on July 3rd, 2023.
- June 26, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - June 26th, 2023: Due to incomplete or missing hospital data received for the June 11th, 2023 through June 17th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on June 26th, 2023.
- June 26, 2023: American Samoa (AS) - June 26th, 2023: Due to incomplete or missing hospital data received for the June 11th, 2023 through June 17th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on June 26th, 2023.
- June 15, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - June 15th, 2023: Due to incomplete or missing hospital data received for the June 4th, 2023 through June 10th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on June 15th, 2023.
- June 15, 2023: American Samoa (AS) - June 15th, 2023: Due to incomplete or missing hospital data received for the June 4th, 2023 through June 10th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on June 15th, 2023.
- June 8, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - June 8th, 2023: Due to incomplete or missing hospital data received for the May 28th, 2023 through June 3rd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on June 8th, 2023.
- June 8, 2023: American Samoa (AS) - June 8th, 2023: Due to incomplete or missing hospital data received for the May 28th, 2023 through June 3rd reporting period, the COVID-19 Hospital Admissions Level could not be calculated for AS and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on June 8th, 2023.
- June 1, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - June 1st, 2023: Due to incomplete or missing hospital data received for the May 21st, 2023 through May 27th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on June 1st, 2023.
- May 25, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - May 25th, 2023: Due to incomplete or missing hospital data received for the May 14th, 2023 through May 20th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on May 25th, 2023.
- May 18, 2023: Commonwealth of the Northern Mariana Islands (CNMI) - May 18th, 2023: Due to incomplete or missing hospital data received for the May 7th, 2023 through May 13th reporting period, the COVID-19 Hospital Admissions Level could not be calculated for CNMI and will be reported as "NA" or "Not Available" in the COVID-19 Hospital Admissions Level data released on May 18th, 2023.

- **% Change in new hospital admissions with confirmed COVID-19 from the prior week:** Percent change in the current weekly total new admissions of patients with laboratory-confirmed COVID-19 per 100,000 population compared with the prior week.
- **% Staffed inpatient beds occupied by patients with confirmed COVID-19, past week:** Percentage of all staffed inpatient beds occupied by patients with laboratory-confirmed COVID-19 (including both adult and pediatric patients) within the in the entire jurisdiction is calculated as an average value of daily percentages for the week-over-week period (e.g., if only 6 of 7 days are reported those three is taken). Averages are separately calculated for the daily numbers (patients hospitalized with confirmed COVID-19) and denominators (staffed inpatient beds). The average percentage can then be taken as the ratio of these two values for the entire jurisdiction.
- **% Staffed inpatient beds occupied by patients with confirmed COVID-19 from the prior week:** The absolute change in the percent of staffed ICU beds occupied by patients with laboratory-confirmed COVID-19 represents the week-over-week absolute difference between the average occupancy of patients with confirmed COVID-19 in staffed inpatient beds in the past week, compared with the prior week, in the entire jurisdiction.
- **% Staffed ICU beds occupied by patients with confirmed COVID-19, past week:** Percentage of all staffed inpatient beds occupied by adult patients with confirmed COVID-19 within the in the entire jurisdiction is calculated as an average value of valid daily values within the past week (e.g., if only three valid values, the average of those three is taken). Averages are separately calculated for the daily numbers (adult patients hospitalized with confirmed COVID-19) and denominators (staffed adult ICU beds). The average percentage can then be taken as the ratio of these two values for the entire jurisdiction.
- **New hospital admissions with confirmed COVID-19 from the prior week:** The absolute change in the percent of staffed ICU beds occupied by patients with laboratory-confirmed COVID-19 represents the week-over-week absolute difference between the average occupancy of patients with confirmed COVID-19 in staffed adult ICU beds for the past week, compared with the prior week, in the in the entire jurisdiction.
- For all metrics, if there are no data in the previous week, the percent change is shown as displayed as "insufficient data".
- For downloading the county-level NHSN hospitalization data displayed here: https://data.cdc.gov/Public-Health-Surveillance/Weekly-United-States-COVID-19-Hospitalization-Metric/aemt-mg7g

Death Data

- **Source:** Provisional Deaths from the CDC's National Center for Health Statistics (NCHS) National Vital Statistics System (NVSS).
- Provisional data are from counts of deaths based on the flow of mortality records into the NCHS. Data include those with COVID-19 coded to ICD-10 codes U07.1, as an underlying or contributing cause of death on the death certificate. Death data are displayed by date of death rather than by date received or processed. Provisional death counts for deaths in recent weeks are incomplete and will increase as more data are received.
- Number of deaths reported in this file are the total number of COVID-19 deaths received and coded as of the date of analysis and may not represent all deaths that occurred in that period. Counts of deaths with dates of death occurring before or after the reporting period are not included in the file.
- Data during recent periods are incomplete because of the lag in time between when a death occurs and when a death certificate is completed, submitted to NCHS, and processed for reporting. This delay can range from 1 week to 8 weeks or more, depending on the jurisdiction. The most recent 3 weeks of data are shaded gray and may change significantly because additional records received by NCHS reporting is <95% during this period.
- Provisional death counts and rates are for deaths among U.S. residents and occurring in the 50 states, plus the District of Columbia and New York City. Assignment to a geographic area is based on the place of residence listed on the death certificate. New York state estimates include New York City but are also presented separately. Puerto Rico data are for deaths to-date (ytd) and are reported separately for Puerto Rico (and as part of HHS Region 2). Data from other U.S. territories are not included in NVSS provisional reporting.
- The percentage of all reported deaths that are attributed to COVID-19 is calculated as the number of COVID-19 deaths divided by the number of deaths from all causes x 100. The percentage of COVID-19 deaths is less affected by incomplete reporting in recent weeks because death certificates from COVID-19 deaths are typically received more quickly.
- Rates were calculated as the number of provisional deaths occurring in the specified week/month divided by the population estimated as of July 1, 2021, multiplied by 100,000 and annualized. Population data are from the U.S. Census Bureau in lieu of the April 1, 2020 decennial population count (see https://wwwn2.census.gov/programs-surveys/popest/technical-documentation/methodology/2020-2021/2020-nat-methods.pdf).
- Rates were age-adjusted to the 2000 standard population using the direct method (see https://www.cdc.gov/nchs/data/nvsr/nvsr70/nvsr70-08-508.pdf). These rates differ from annual age-adjusted rates presented in NCHS publications based on a full year of data and annualized weekly/monthly age-adjusted rates which have been adjusted to allow comparison with annual rates. Annualized rates present deaths per year per 100,000 population that would be expected in a year if the observed period - specific mortality rates persisted for a full year.
- Sub-national death counts between 1-9 are suppressed in accordance with NCHS data confidentiality standards. Rates based on death counts <20 do not meet NCHS standards of reliability and are not shown. Counts of deaths among persons aged <65 years are subject to 20% or greater uncertainty due to small numbers.
- For more information or to view the Provisional Death Data on the NCHS website: https://www.cdc.gov/nchs/covid19/mortality-overview.htm.
- For downloading the NVSS mortality data displayed here: https://data.cdc.gov/NCHS/Provisional-COVID-19-death-counts-rates-and-percen/muzy-jte6.

Emergency Department Visits Data

- **Source:** Emergency Department (ED) visits from the National Syndromic Surveillance Program (NSSP)
- NSSP is a collaboration among CDC, federal partners, state and local health departments, and academic and private sector partners to collect, analyze, and share electronic patient encounter data received from multiple health care settings. For insights into COVID-19 trends, visits that have a COVID-19 diagnosis at discharge are monitored for a subset of emergency departments in 50 states, the District of Columbia, and Guam. Coverage may vary by jurisdiction and week.
- The percentage of ED visits for patients with a discharge diagnosis of COVID-19 is calculated nationally, regionally, and for each state presented. Percent change is calculated relative to the previous week as ((% this week)-(% last week))/(% last week). Data presented in state websites may vary due to slight differences in the definitions used.
- ED visit data are available for Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Jurisdictions with low ED facility participation or where diagnosis information is incomplete are not shown.
- For some jurisdictions with a small number of annual visits reported to NSSP, rapid and large changes may appear in the data displayed.
- For more information on NSSP, see: https://www.cdc.gov/nssp/index.html. For technical information, see: https://www.cdc.gov/ncird/surveillance/respiratory-illnesses/index.html#companion-guide

Testing Data

- **Source:** National Respiratory and Enteric Virus Surveillance System (NREVSS)
- The data represent SARS-CoV-2 Nucleic Acid Amplification Tests (NAATs), which include reverse transcriptase-polymerase chain reaction (RT-PCR) tests from a sentinel network of NREVSS-reporting laboratories in the United States, including clinical, public health and commercial laboratories (https://www.cdc.gov/surveillance/data-collection/laboratory-network.html). These data include antigen, antibody, and at-home test results. Test positivity data are presented graphically at the HHS Region level.
- All data are provisional and subject to change. Data is complete for the past 1 week, and more complete for data reported for the period 2 weeks earlier (>90%).
- Because the data are from a sentinel network of laboratories, results may vary geographically. The data do not include all test results within a jurisdiction and therefore may not reflect all, COVID-19 NAATs in the United States. There are data from all 50 states, including the District of Columbia, Puerto Rico and the U.S. Virgin Islands, across the 10 HHS regions. Test results from Puerto Rico and the U.S. Virgin Islands are reported as part of HHS Region 2. Data from other U.S. territories are not reported to NREVSS.
- Percent positivity is one of the metrics used to monitor COVID-19 transmission over time and by area. Percent positivity is calculated by dividing the number of positive NAATs by the total number of NAATs administered, then multiplying by 100 (# of positive NAAT tests / total NAAT tests) x 100.
- The laboratory testing data for tests performed, not individual people. In the table and upon hovering on the map, the total test counts in the data reflect the latest reported data from NREVSS laboratories and may not match the data presented by various jurisdictions.
- On May 11, 2023, CDC discontinued updating the COVID electronic laboratory reporting (CELR) platform as the primary laboratory source of COVID-19 results. These data are archived at health.data.gov.
- For more information about NREVSS, please see: https://www.cdc.gov/surveillance/nrevss/index.html
- For downloading the NREVSS COVID-19 testing data displayed here: https://data.cdc.gov/Laboratory-Surveillance/Percent-Positivity-of-COVID-19-Nucleic-Acid-Amplifi/prdp-uwf4.
