

Foodborne Outbreaks

Active Investigations of Multistate Foodborne Outbreaks

Last updated December 20, 2023 (updated every Wednesday)

CDC typically coordinates between 17 and 36 investigations of foodborne illnesses involving multiple states each week. The table below shows the number of active CDC investigations for *Campylobacter*, Shiga toxin-producing *E. coli*, *Listeria monocytogenes*, and *Salmonella*. It also includes links to any current CDC outbreak notices.

Campylobacter

- 1 active multistate investigation
- No active notices or alerts

E. coli

- 1 active multistate investigation
- No active notices or alerts

Listeria

- 4 active multistate investigations
- Food Safety Alert: [Peaches, Nectarines, and Plums](#)

Salmonella

- 4 active multistate investigations
- Food Safety Alert: [Cantaloupes](#)

CDC works closely with our federal regulatory partners, FDA and USDA-FSIS, on foodborne outbreak investigations. For more information about how they work to identify and remove contaminated food from the market, visit their website:
