

PUBLIC HEALTH EMERGENCY PREPAREDNESS COOPERATIVE AGREEMENT (PHEP) PROGRAM

WASHINGTON, D.C.

PHEP Then

In response to the deadly events of September 11, 2001, and the subsequent anthrax attacks, Congress established a new program to help health departments across the nation prepare for emergencies. Since then CDC's [Public Health Emergency Preparedness \(PHEP\) program](#) has partnered with state, local, and territorial public health departments to prepare for, withstand, and recover from potentially devastating public health emergencies.

Every year since, the PHEP program has provided vital resources to ensure communities can effectively respond to infectious disease outbreaks, natural disasters, and chemical, biological, radiological, or nuclear events.

PHEP Now

In 2018, PHEP provided \$620 million across public health departments to improve response readiness. Funds are also used to support epidemiologists (disease detectives), lab staff, planners, and other preparedness staff on the ground.

In the future, CDC will continue supporting PHEP recipients by sharing technical expertise, best practices, and lessons learned, along with tools and resources to identify and address gaps.

AT A GLANCE

In Washington, D.C.

- ▶ **0.7 million residents**
- ▶ - reside in Cities Readiness Initiative metropolitan statistical areas (CRI MSA). A federally funded program, CRI helps cities effectively respond to large-scale public health emergencies requiring life-saving medications and medical supplies.
- ▶ **N/A*** local public health departments

*Health department is centralized at the state level

Frequent Public Health Emergencies

- ▶ Terrorism/Security Threat
- ▶ National Special Security Events
- ▶ Mass-Gathering Special Events

Key Emergency Operations Center Activations

- ▶ 2017: 58th Presidential Inauguration
- ▶ 2018: George H.W. Bush State Funeral

PHEP funds programs and activities that build and strengthen the nation's preparedness for public health emergencies.

Preparedness and Response Funding Snapshot

FY 2018 PHEP \$6,379,708

Base Plus Population \$5,755,894
Cities Readiness Initiative \$623,814
Level 1 Chemical Lab \$—

PHEP IN ACTION—PHEP HELPS KEEP RESIDENTS SAFE DURING STATE FUNERAL OF PRESIDENT GEORGE H.W. BUSH

In Washington, D.C., PHEP ensures that the health department works with federal, state, local, and non-governmental partners to keep residents safe during National Special Security Events (NSSE). As the nation's capital, Washington, D.C. has more NSSEs than any other jurisdiction. During the funeral of President George H.W. Bush in December 2018, the Washington, D.C. health department—relying on PHEP partnerships—activated their Health Emergency Coordination Center and coordinated with local hospitals to prepare for a possible surge. It also deployed 34 Medical Reserve Corps members to provide medical treatment and patient tracking support for the crowds standing in line outside the U.S. Capitol and the distinguished guests attending the memorial service at the National Cathedral.

CDC identified 15 public health preparedness capabilities critical to public health preparedness.

2018 WASHINGTON, D.C. TOP PHEP CAPABILITY INVESTMENTS

1. **Community Preparedness**
2. **Emergency Operations Coordination**
3. **Information Sharing**
4. **Non-Pharmaceutical Interventions**
5. **Medical Countermeasure Dispensing**

For a complete list of all 15 public health preparedness capabilities, visit <https://www.cdc.gov/cpr/readiness/capabilities.htm>.

Medical Countermeasure Readiness: Ensuring that medicine and supplies get to those who need them most during an emergency.

KEY STRENGTH

Well-established and frequently utilized emergency operations systems

KEY CHALLENGE

Recruitment and training of points of dispensing staff

States, territories, and localities are required to develop emergency plans covering children, pregnant women, and other vulnerable populations.

Population	2017
Households included children	32%
Respondents who know they are pregnant	3%
Respondents 65 or older	15%
Respondents who reported having diabetes	8%
Respondents who reported a condition that limits activities	—
Respondents who reported a health problem that required the use of specialized equipment	—

PHEP funds support staff who have expertise in many different areas.

PHEP-Funded Staff	2017
CDC Field Staff	3
Educators	2
Epidemiologists	2
Health Professionals	—
Laboratorians	—
Other Staff	22

PHEP PROGRAM—KEY PERFORMANCE MEASURE RESULTS

In an emergency, it is critical that staff can meet quickly to plan for, lead, and manage a public health response. Public health staff serve as Incident Commanders, Public Information Officers, Planning Section Chiefs, Operations Section Chiefs, and other response roles.

Emergency Operations Coordination	2015	2016	2017
Number of minutes for public health staff with incident management lead roles to report for immediate duty	N/A	52	780

Timely and effective communication between lab and epidemiologic staff can reduce death and injuries in a public health emergency.

Public Health Laboratory Testing	2017
Results of communication drills between laboratory and epidemiological staff completed within 45 minutes	Drill 1: Completed drill, but not in time Drill 2: Completed drill in time

Laboratory Response Network biological (LRN-B) and PulseNet labs rapidly identify and notify CDC of potential biological health threats to minimize disease outbreaks. CDC manages the LRN-B, a group of public health labs with testing capabilities to detect and confirm biological health threats. CDC also manages PulseNet, a national network of labs that analyzes and connects foodborne illness cases together to identify outbreak sources.

Current number of LRN-B public health labs: 1

Public Health Laboratory Testing: LRN-B	2015	2016	2017
Proportion of LRN-B proficiency tests passed	2/2	2/2	1/2
Public Health Laboratory Testing: PulseNet	2015	2016	2017
Percentage of <i>E. coli</i> -positive tests analyzed and uploaded into PulseNet national database within four working days	N/A	N/A	N/A
Percentage of <i>Listeria</i> -positive tests analyzed and uploaded into PulseNet national database within four working days	50% (target: 90%)	N/A	0% (target: 90%)

LRN chemical (LRN-C) labs rapidly identify exposures to toxic chemicals, aid diagnoses, and minimize further human exposures. CDC manages the LRN-C, a group of labs with testing capabilities to detect and confirm chemical health threats. LRN-C labs are designated as Level 1, 2, or 3, with Level 1 labs demonstrating the most advanced capabilities.

Current number and level of LRN-C Labs: 1 (Level 2)

Public Health Laboratory Testing: LRN-C	2015	2016	2017
Proportion of core chemical agent detection methods demonstrated by Level 1 or Level 2 labs	9/9	9/9	9/9
Number of additional chemical agent detection methods demonstrated by Level 1 or Level 2 labs	0	0	0
Result of LRN exercise to collect, package, and ship samples	Passed	Passed	Passed
