Child COVID-19 Vaccination Coverage

Updates to child estimates will resume January 24, 2024.

COVID-19 vaccination coverage for [children](#) 6 months through 17 years is based on data from CDC's National Immunization Survey-Child COVID Module. Estimates of vaccination coverage are based on parental report.

- As of December 30, 2023, 8.0% (95% Confidence Interval: 7.1%-9.0%) of children were reported to be up to date with the 2023-24 COVID-19 vaccine.
 - An additional 13.4% (9.7%-17.1%) of children had a parent who reported they definitely planned to get their child vaccinated.
 - Reported receipt of the COVID-19 vaccine is low across all socio-demographic subgroups and has consistently varied by age, race and ethnicity, poverty status, health insurance status, and urbanicity.
 - Additional COVID-19 vaccination data for children by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).

All Adults Coverage

Data and Charts for All Adults Coverage >

Adult COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates among [adults 18 years and older](#) are based on data from CDC's National Immunization Survey–Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of January 6, 2024, 21.4% (95% Confidence Interval: 20.6%-22.2%) of adults reported having received an updated 2023-24 COVID-19 vaccine since September 14, 2023.
 - An additional 14.2% (13.0%-15.3%) reported that they definitely plan to get vaccinated.
 - Vaccination coverage increased by age and was highest among adults ≥ 75 years [42.5%, (38.7%-46.3%)].
 - White adults had higher vaccination coverage than adults in most other race and ethnicity groups, with coverage ranging from 10.0% (4.5%-15.5%) among non-Hispanic Pacific Islander/Native Hawaiian adults to 25.4% (24.3%-26.4%) among non-Hispanic White adults.
 - Vaccination coverage was lower among adults residing in rural areas [16.7% (14.7%-18.7%)] than among those living in suburban [21.9% (20.7%-23.0%)] and urban [22.5% (21.0%-24.0%)] areas.
 - Vaccination coverage was higher among insured adults [23.3% (22.5%-24.2%)] than uninsured adults [7.5% (4.9%-10.0%)].
 - Across states and DC, vaccination coverage ranged from 9.3% (6.8%-11.8%) in Mississippi to 48.6% (40.1%-57.1%) in Vermont.
 - Additional COVID-19 vaccination data for adults by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
