

Mpox

Mpox Cases by Age and Gender and Race and Ethnicity

Data as Reported to CDC as of 11 Jan 2024 2:00 PM EDT

As of January 10, 2024, this data will no longer be updated. For updated case data please check [Weekly Statistics from the National Notifiable Diseases Surveillance System \(NNDSS\)](#).

Mpox cases reported to CDC: Age and Gender

[Download Data \(CSV\)](#)

Data Table

	0 to 5	6 to 10	11 to 15	16 to 20
Men	26	5	11	619
Women	11	6	5	66
Transgender men	0	0	0	5
Transgender women	0	0	0	7
Another sex/gender	0	1	0	14

Footnotes

Both age and sex or gender data were available for 99.3% of cases reported to CDC. People whose reported sex differed from their reported gender were classified as transgender. Among people for whom reported gender was not available, but sex was reported, sex was used to categorize people as men or women. While the case report form specifies sex assigned at birth, there are variations in how jurisdictions collect information on sex, and in some cases this may represent current gender identity. These case counts include those who tested positive for either monkeypox virus or orthopoxvirus (OPX) as described in the case definition.

Mpox cases reported to CDC by Race and Ethnicity

Race and Ethnicity+	Count	Percent
African American or Black	9,633	32.22%
Hispanic or Latino	9,283	31.05%
White	8,877	29.7%
Asian	859	2.87%
Other	624	2.09%
Multiple Races	415	1.39%
American Indian or Alaska Native	124	0.41%
Native Hawaiian or Pacific Islander	78	0.26%
Missing	1,796	-

Proportion of All Cases by Race and Ethnicity by Month

Data Table

	May-2022	Jun-2022	Jul-2022	Aug-2022
White	45%	45%	33%	27%
Other	4%	1%	2%	2%
Native Hawaiian or ...	0	0%	0%	0%
Multiple Races	0	1%	1%	2%
Hispanic or Latino	29%	31%	31%	32%
African American or...	14%	18%	30%	34%
Asian	9%	4%	3%	3%
American Indian or ...	0	0%	0%	1%

Footnotes

Information on race and ethnicity was available for 94.3% of cases reported to CDC. Race and ethnicity information is often missing in reportable disease surveillance and may require contacting and interviewing the person. The Hispanic or Latino category includes people of any race, and all other categories exclude those who identify as Hispanic or Latino. Race and ethnicity was classified into the following mutually exclusive categories: American Indian or Alaska Native, Asian, Black or African American, Hispanic or Latino, Persons of Multiple Races, Native Hawaiian or Other Pacific Islander, and White. These case counts include those who tested positive for either mpox virus or orthopoxvirus (OPX), therefore classified as probable cases as described in the case definition.
