

## Foodborne Outbreaks

# Active Investigations of Multistate Foodborne Outbreaks

*Last updated January 24, 2024 (updated every Wednesday)*

CDC typically coordinates between 17 and 36 investigations of foodborne illnesses involving multiple states each week. The table below shows the number of active CDC investigations for *Campylobacter*, Shiga toxin-producing *E. coli*, *Listeria monocytogenes*, and *Salmonella*. It also includes links to any current CDC outbreak notices.

### *Campylobacter*

0 active multistate investigations

- No active notices or alerts

### *E. coli*

0 active multistate investigations

- No active notices or alerts

### *Listeria*

4 active multistate investigations

- Food Safety Alert: [Peaches, Nectarines, and Plums](#)

### *Salmonella*

5 active multistate investigations

- Food Safety Alert: [Charcuterie Meats](#)

CDC works closely with our federal regulatory partners, FDA and USDA-FSIS, on foodborne outbreak investigations. For more information about how they work to identify and remove contaminated food from the market, visit their website:
