WEEKLY COVID-19 VACCINATION DASHBOARD

The Weekly COVID-19 Vaccination Dashboard is designed to share weekly COVID-19 vaccination data, including coverage estimates and intent for vaccination, using a variety of data sources including surveys, healthcare claims, electronic medical records, and immunization information systems (IIS) data. The Dashboard will be updated weekly as new data become available. Additional COVID-19 vaccination data, resources, and publications are [available](#). Please [email](#) to share any feedback.

[Data Summary](#)Child Coverage (NIS) [Data and Charts for Child Coverage >](#)

Child COVID-19 Vaccination Coverage

Updates to child estimates will resume January 24, 2024.

COVID-19 vaccination coverage for [children](#) 6 months through 17 years is based on data from CDC's National Immunization Survey-Child COVID Module. Estimates of vaccination coverage are based on parental report.

- As of January 20, 2024, 11.1% (95% Confidence Interval: 10.4%-11.9%) of children were reported to be up to date with the 2023-24 COVID-19 vaccine.
 - An additional 11.4% (9.8%-13.0%) of children had a parent who reported they definitely planned to get their child vaccinated.
 - Reported receipt of the COVID-19 vaccine was low across all socio-demographic subgroups and has consistently varied by child's age, race and ethnicity, poverty status, urbanicity, and mother's education level.
 - Additional COVID-19 vaccination data for children by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
-

All Adults Coverage (NIS)

Data and Charts for All Adults Coverage >

Adult COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates among [adults 18 years and older](#) are based on data from CDC's National Immunization Survey–Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of January 20, 2024, 21.8% (95% Confidence Interval: 21.1%-22.4%) of adults reported having received an updated 2023-24 COVID-19 vaccine since September 14, 2023.
 - An additional 11.6% (10.5%-12.8%) reported that they definitely plan to get vaccinated.
 - Vaccination coverage increased by age and was highest among adults 75 years and older [42.2%, (39.4%-44.9%)].
 - White adults had higher vaccination coverage than adults in all other race and ethnicity groups, with coverage ranging from 11.5% (6.6%-16.5%) among non-Hispanic Pacific Islander/Native Hawaiian adults to 25.7% (24.9%-26.6%) among non-Hispanic White adults.
 - Vaccination coverage was lower among adults residing in rural areas [16.7% (15.4%-18.0%)] than among those living in suburban [22.5% (21.5%-23.4%)] and urban [22.6% (21.6%-23.7%)] areas.
 - Vaccination coverage was higher among insured adults [23.8% (23.1%-24.6%)] than uninsured adults [6.8% (5.5%-8.1%)].
 - Across states and DC, vaccination coverage ranged from 10.5% (8.6%-12.3%) in Mississippi to 44.8% (39.4%-50.2%) in Vermont.
 - Additional COVID-19 vaccination data for adults by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
