WEEKLY COVID-19 VACCINATION DASHBOARD

The Weekly COVID-19 Vaccination Dashboard is designed to share weekly COVID-19 vaccination data, including coverage estimates and intent for vaccination, using a variety of data sources including surveys, healthcare claims, electronic medical records, and immunization information systems (IIS) data. The Dashboard will be updated weekly as new data become available. Additional COVID-19 vaccination data, resources, and publications are [available](#). Please [email](#) to share any feedback.

Data Summary

Child Coverage and Parental Intent for Vaccination (NIS) 

[Data and Charts for Child Coverage >](#)

Child COVID-19 Vaccination Coverage

COVID-19 vaccination coverage for [children](#) 6 months through 17 years is based on data from CDC's National Immunization Survey-Flu (NIS-Flu). Estimates of vaccination coverage are based on parental report.

- As of February 3, 2024, 12.2% (95% Confidence Interval: 11.5%-12.9%) of children were reported to be up to date with the 2023-24 COVID-19 vaccine.
 - An additional 11.3% (9.9%-12.7%) of children had a parent who reported they definitely planned to get their child vaccinated.
 - Reported receipt of the COVID-19 vaccine was low across all socio-demographic subgroups and has consistently varied by child's age, race and ethnicity, poverty status, urbanicity, and mother's education level.
 - Additional COVID-19 vaccination data for children by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
-

Pregnant Persons Coverage (VSD)

[Data and Charts for Pregnant Persons Coverage >](#)

Data for pregnant persons will be updated late in February due to data system updates at VSD sites.

Pregnant Persons COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates for [pregnant persons](#) 18 to 49 years are based on data from CDC's [Vaccine Safety Datalink](#). Estimates of vaccination coverage are based on electronic health data from multiple integrated health systems.

- As of January 27, 2024, 12.5% of pregnant persons had received the updated 2023-24 COVID-19 vaccine.
 - Vaccination coverage was highest among non-Hispanic Asian (21.3%) pregnant persons and lowest among non-Hispanic Black (4.8%) pregnant persons.
 - Additional COVID-19 vaccination data for pregnant persons are available: [Coverage by Population: Pregnant Women](#).
-

Adult Coverage and Intent (NIS)

[Data and Charts for All Adults Coverage >](#)

Adult COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates among [adults 18 years and older](#) are based on data from CDC's National Immunization Survey-Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of February 3, 2024, 21.9% (95% Confidence Interval: 21.4%-22.5%) of adults reported having received an updated 2023-24 COVID-19 vaccine since September 14, 2023.
- An additional 11.3% (10.3%-12.2%) reported that they definitely plan to get vaccinated.
- Vaccination coverage increased by age and was highest among adults 75 years and older [43.5%, (40.7%-46.4%)].
- White adults had higher vaccination coverage than adults in all other race and ethnicity groups, with coverage ranging from 12.9% (11.7%-14.2%) among Hispanic adults to 25.8% (25.1%-26.6%) among non-Hispanic White adults.
- Vaccination coverage was lower among adults residing in rural areas [18.2% (16.5%-19.9%)] than among those living in suburban [22.2% (21.4%-23.0%)] and urban [23.0% (22.1%-24.0%)] areas.
- Vaccination coverage was higher among insured adults [24.0% (23.4%-24.6%)] than uninsured adults [6.6% (5.6%-7.5%)].
- Across states and the District of Columbia, vaccination coverage ranged from 10.5% (8.4%-12.5%) in Mississippi to 41.9% (37.0%-46.8%) in Vermont.

- Additional COVID-19 vaccination data for adults by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).

Vaccine Administration and Coverage by Jurisdiction (IIS) ^

[Data and Charts for Jurisdiction Vaccine Administration and Coverage >](#)

Monthly Jurisdiction Vaccine Administration and Coverage (IIS)

Updated 2023-24 COVID-19 vaccination coverage estimates as of the end of December 2023 based on IIS data submitted to CDC by 52 immunization awardee jurisdictions.

- For children 6 months – 17 years
 - Among the currently reporting 44 state and city IIS jurisdictions, COVID-19 vaccination coverage among children 6 months – 17 years ranged from 0.2% to 13.4%. Among 8 reporting island jurisdictions, coverage ranged from 0.0% to 0.6%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).
- For adults 18 years and older:
 - Among the currently reporting 44 state and city IIS jurisdictions, COVID-19 vaccination coverage among adults 18 years and older ranged from 1.0% to 22.9%. Among 8 reporting island jurisdictions, coverage ranged from 0.0% to 2.6%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).

Adult Vaccinations Administered (IQVIA) ^

[Data and Charts for Adult Vaccinations Administered >](#)

Updated 2023-24 COVID-19 Vaccinations Administered in Pharmacies and Medical Offices (Data Source: IQVIA)

COVID-19 vaccinations administered at pharmacies and physician medical offices for [adults 18 years and older](#) based on healthcare claims data.

- As of January 20, 2024, an estimated 28.62 million doses were administered in pharmacies and an estimated 2.05 million doses were administered in physician medical offices.
