WEEKLY COVID-19 VACCINATION DASHBOARD

The Weekly COVID-19 Vaccination Dashboard is designed to share weekly COVID-19 vaccination data, including coverage estimates and intent for vaccination, using a variety of data sources including surveys, healthcare claims, electronic medical records, and immunization information systems (IIS) data. The Dashboard will be updated weekly as new data become available. Additional COVID-19 vaccination data, resources, and publications are [available](#). Please [email](#) to share any feedback.

Data Summary

Child Coverage and Parental Intent for Vaccination (NIS) 

[Data and Charts for Child Coverage >](#)

Child COVID-19 Vaccination Coverage

COVID-19 vaccination coverage for [children](#) 6 months through 17 years is based on data from CDC's National Immunization Survey-Flu (NIS-Flu). Estimates of vaccination coverage are based on parental report.

- As of February 10, 2024, 12.4% (95% Confidence Interval: 11.8%-13.0%) of children were reported to be up to date with the 2023-24 COVID-19 vaccine.
 - An additional 10.5% (9.1%-12.0%) of children had a parent who reported they definitely planned to get their child vaccinated.
 - Reported receipt of the COVID-19 vaccine was low across all socio-demographic subgroups and has consistently varied by child's age, race and ethnicity, poverty status, urbanicity, and mother's education level.
 - Additional COVID-19 vaccination data for children by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
-

Pregnant Persons Coverage (VSD)

[Data and Charts for Pregnant Persons Coverage >](#)

Data for pregnant persons will be updated late in February due to data system updates at VSD sites.

Pregnant Persons COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates for [pregnant persons](#) 18 to 49 years are based on data from CDC's [Vaccine Safety Datalink](#). Estimates of vaccination coverage are based on electronic health data from multiple integrated health systems.

- As of January 27, 2024, 12.5% of pregnant persons had received the updated 2023-24 COVID-19 vaccine.
 - Vaccination coverage was highest among non-Hispanic Asian (21.3%) pregnant persons and lowest among non-Hispanic Black (4.8%) pregnant persons.
 - Additional COVID-19 vaccination data for pregnant persons are available: [Coverage by Population: Pregnant Women](#).
-

Adult Coverage and Intent (NIS)

[Data and Charts for All Adults Coverage >](#)

Adult COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates among [adults 18 years and older](#) are based on data from CDC's National Immunization Survey-Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of February 10, 2024, 22.3% (95% Confidence Interval: 21.7%-22.9%) of adults reported having received an updated 2023-24 COVID-19 vaccine since September 14, 2023.
- An additional 10.8% (9.5%-12.0%) reported that they definitely plan to get vaccinated.
- Vaccination coverage increased by age and was highest among adults 75 years and older [43.8% (41.0%-46.6%)].
- White adults had higher vaccination coverage than adults in all other race and ethnicity groups, with coverage ranging from 14.2% (12.5%-15.8%) among Hispanic adults to 26.1% (25.3%-26.9%) among non-Hispanic White adults.
- Vaccination coverage was lower among adults residing in rural areas [18.4% (17.0%-19.8%)] than among those living in suburban [22.7% (21.9%-23.5%)] and urban [23.2% (22.1%-24.4%)] areas.
- Vaccination coverage was higher among insured adults [24.3% (23.7%-25.0%)] than uninsured adults [7.5% (6.4%-8.6%)].
- Across states and the District of Columbia, vaccination coverage ranged from 10.2% (8.4%-12.0%) in Mississippi to 44.2% (39.0%-49.5%) in Vermont.

- Additional COVID-19 vaccination data for adults by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
-

Vaccine Administration and Coverage by Jurisdiction (IIS)

[Data and Charts for Jurisdiction Vaccine Administration and Coverage >](#)

Monthly Jurisdiction Vaccine Administration and Coverage (IIS)

Updated 2023-24 COVID-19 vaccination coverage estimates as of the end of December 2023 based on IIS data submitted to CDC by 52 immunization awardee jurisdictions.

- For children 6 months – 17 years:
 - Among the currently reporting 44 state and city IIS jurisdictions, COVID-19 vaccination coverage among children 6 months – 17 years ranged from 0.2% to 13.4%. Among 8 reporting island jurisdictions, coverage ranged from 0.0% to 0.6%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).
 - For adults 18 years and older:
 - Among the currently reporting 44 state and city IIS jurisdictions, COVID-19 vaccination coverage among adults 18 years and older ranged from 1.0% to 22.9%. Among 8 reporting island jurisdictions, coverage ranged from 0.0% to 2.6%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).
-

Adults 65+ Coverage (CMS)

[Data and Charts for Adults 65+ Coverage >](#)

Adults 65 Years and Older (Medicare Fee-for-service) COVID-19 Vaccination Coverage

COVID-19 vaccination coverage among [Medicare fee-for-service beneficiaries 65 years and older](#)  is assessed using data files from the Medicare Fee-For-Service administrative claims data managed by the Centers for Medicare & Medicaid Services.

- As of November 25, 2023, an estimated 23.0% of Medicare fee-for-service beneficiaries 65 years and older were vaccinated.
 - Estimates by race and ethnicity group: 7.5% of Hispanic adults, 16.0% of Black, non-Hispanic adults, 23.8% of White, non-Hispanic adults, 21.7% of adults of Other, non-Hispanic race and ethnicity, and 19.7% of Asian, non-Hispanic adults were vaccinated.
-

Adult Vaccinations Administered (IQVIA)

[Data and Charts for Adult Vaccinations Administered >](#)

Updated 2023-24 COVID-19 Vaccinations Administered in Pharmacies and Medical Offices (Data Source: IQVIA)

COVID-19 vaccinations administered at pharmacies and physician medical offices for [adults 18 years and older](#) based on healthcare claims data.

- As of January 27, 2024, an estimated 28.90 million doses were administered in pharmacies and an estimated 2.11 million doses were administered in physician medical offices.
