## Weekly COVID-19 Vaccination Dashboard

# WEEKLY COVID-19 VACCINATION DASHBOARD

The Weekly COVID-19 Vaccination Dashboard is designed to share weekly COVID-19 vaccination data, including coverage estimates and intent for vaccination, using a variety of data sources including surveys, healthcare claims, electronic medical records, and immunization information systems (IIS) data. The Dashboard will be updated weekly as new data become available. Additional COVID-19 vaccination data, resources, and publications are [available](#). Please [email](#) to share any feedback.

### Data Summary

#### Child Coverage and Parental Intent for Vaccination (NIS)

[Data and Charts for Child Coverage >](#)

#### Child COVID-19 Vaccination Coverage

COVID-19 vaccination coverage for [children](#) 6 months through 17 years is based on data from CDC's National Immunization Survey-Flu (NIS-Flu). Estimates of vaccination coverage are based on parental report.

- As of February 17, 2024, 13.1% (95% Confidence Interval: 12.4%-13.7%) of children were reported to be up to date with the 2023-24 COVID-19 vaccine.
- An additional 9.6% (8.2%-10.9%) of children had a parent who reported they definitely planned to get their child vaccinated.
- Reported receipt of the COVID-19 vaccine was low across all socio-demographic subgroups and has consistently varied by child's age, race and ethnicity, poverty status, urbanicity, and mother's education level.
- Additional COVID-19 vaccination data for children by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).

## Pregnant Persons Coverage (VSD) ^

[Data and Charts for Pregnant Persons Coverage >](#)

Data for pregnant persons will be updated in March due to data system updates at VSD sites.

### Pregnant Persons COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates for [pregnant persons](#) 18 to 49 years are based on data from CDC's [Vaccine Safety Datalink](#). Estimates of vaccination coverage are based on electronic health data from multiple integrated health systems.

- As of January 27, 2024, 12.5% of pregnant persons had received the updated 2023-24 COVID-19 vaccine.
- Vaccination coverage was highest among non-Hispanic Asian (21.3%) pregnant persons and lowest among non-Hispanic Black (4.8%) pregnant persons.
- Additional COVID-19 vaccination data for pregnant persons are available: [Coverage by Population: Pregnant Women](#).

---

## Adult Coverage and Intent (NIS) ^

[Data and Charts for All Adults Coverage >](#)

### Adult COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates among [adults 18 years and older](#) are based on data from CDC's National Immunization Survey-Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of February 17, 2024, 22.3% (95% Confidence Interval: 21.8%-22.9%) of adults reported having received an updated 2023-24 COVID-19 vaccine since September 14, 2023.
- An additional 11.1% (9.7%-12.5%) reported that they definitely plan to get vaccinated.
- Vaccination coverage increased by age and was highest among adults 75 years and older [42.8% (40.4%-45.2%)].
- White adults had higher vaccination coverage than adults in all other race and ethnicity groups, with coverage ranging from 14.5% (13.0%-16.1%) among Hispanic adults to 26.0% (25.3%-26.7%) among non-Hispanic White adults.
- Vaccination coverage was lower among adults residing in rural areas [17.8% (16.6%-18.9%)] than among those living in suburban [22.7% (22.0%-23.4%)] and urban [23.5% (22.4%-24.6%)] areas.
- Vaccination coverage was higher among insured adults [24.4% (23.7%-25.0%)] than uninsured adults [7.3% (6.4%-8.3%)].
- Across states and the District of Columbia, vaccination coverage ranged from 10.1% (8.4%-11.7%) in Mississippi to 45.5% (39.8%-51.1%) in Vermont.

- Additional COVID-19 vaccination data for adults by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).

## Vaccine Administration and Coverage by Jurisdiction (IIS) ^

[Data and Charts for Jurisdiction Vaccine Administration and Coverage >](#)

### Monthly Jurisdiction Vaccine Administration and Coverage (IIS)

Updated 2023-24 COVID-19 vaccination coverage estimates as of the end of December 2023 based on IIS data submitted to CDC by 52 immunization awardee jurisdictions.

- For children 6 months – 17 years:
  - Among the currently reporting 44 state and city IIS jurisdictions, COVID-19 vaccination coverage among children 6 months – 17 years ranged from 0.2% to 13.4%. Among 8 reporting island jurisdictions, coverage ranged from 0.0% to 0.6%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).
- For adults 18 years and older:
  - Among the currently reporting 44 state and city IIS jurisdictions, COVID-19 vaccination coverage among adults 18 years and older ranged from 1.0% to 22.9%. Among 8 reporting island jurisdictions, coverage ranged from 0.0% to 2.6%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).
