

Look into your future: Work related injuries are predictable and preventable! Can you find all the safety violations?

1. Untidy housekeeping 2. Cord in puddle of water 3. Facing outward on ladder 4. No 3-point contact on ladder 5. Improper use of step ladder 6. Missing 4 to 1 ratio on extension ladder 7. Standing on top rung 8. No hand hats 9. No safety glasses 10. Ring on finger 11. Incorrect use of hammer 12. Incorrect hand placement when using tools 13. Hammer placed on top of ladder 14. Incorrect passage of open utility knife 15. Inattentiveness when using power tool 16. Headphones

Did you know?

When working in or near a trench one cubic yard of soil can weigh as much as a pickup truck, approximately 3,000 lbs!

Nails fired from a nail gun can have the penetrating characteristics and abilities of bullets fired from a firearm.

A healthy worker can lose over 16 pounds of sweat in an eight-hour work day. This can lead to heat stress.

Falling and hitting your head from 3FT is similar to running full force in to a brick wall.

An object 60% smaller than a grain of sand can cause serious injury to the lens of the eye.

Electricity can enter the body at one point, bounce around inside causing extensive internal damage, and then exit at another point.

Practice Safety. Beware of the Obvious.
