

Mpox

# 2022-2023 Mpox Outbreak Global Map

Data as of 05 Mar 2024 5:30 PM EDT

View: ☒ CASES ☐ DEATHS

Starting in September 2023, the data will be updated once per month.

[< 2022-2023 U.S. Mpox Outbreak](#)

## Confirmed Cases

94,274

Total Cases

91,842

in locations that have not historically reported mpox

2,432

in locations that have historically reported mpox

## Locations with cases

118

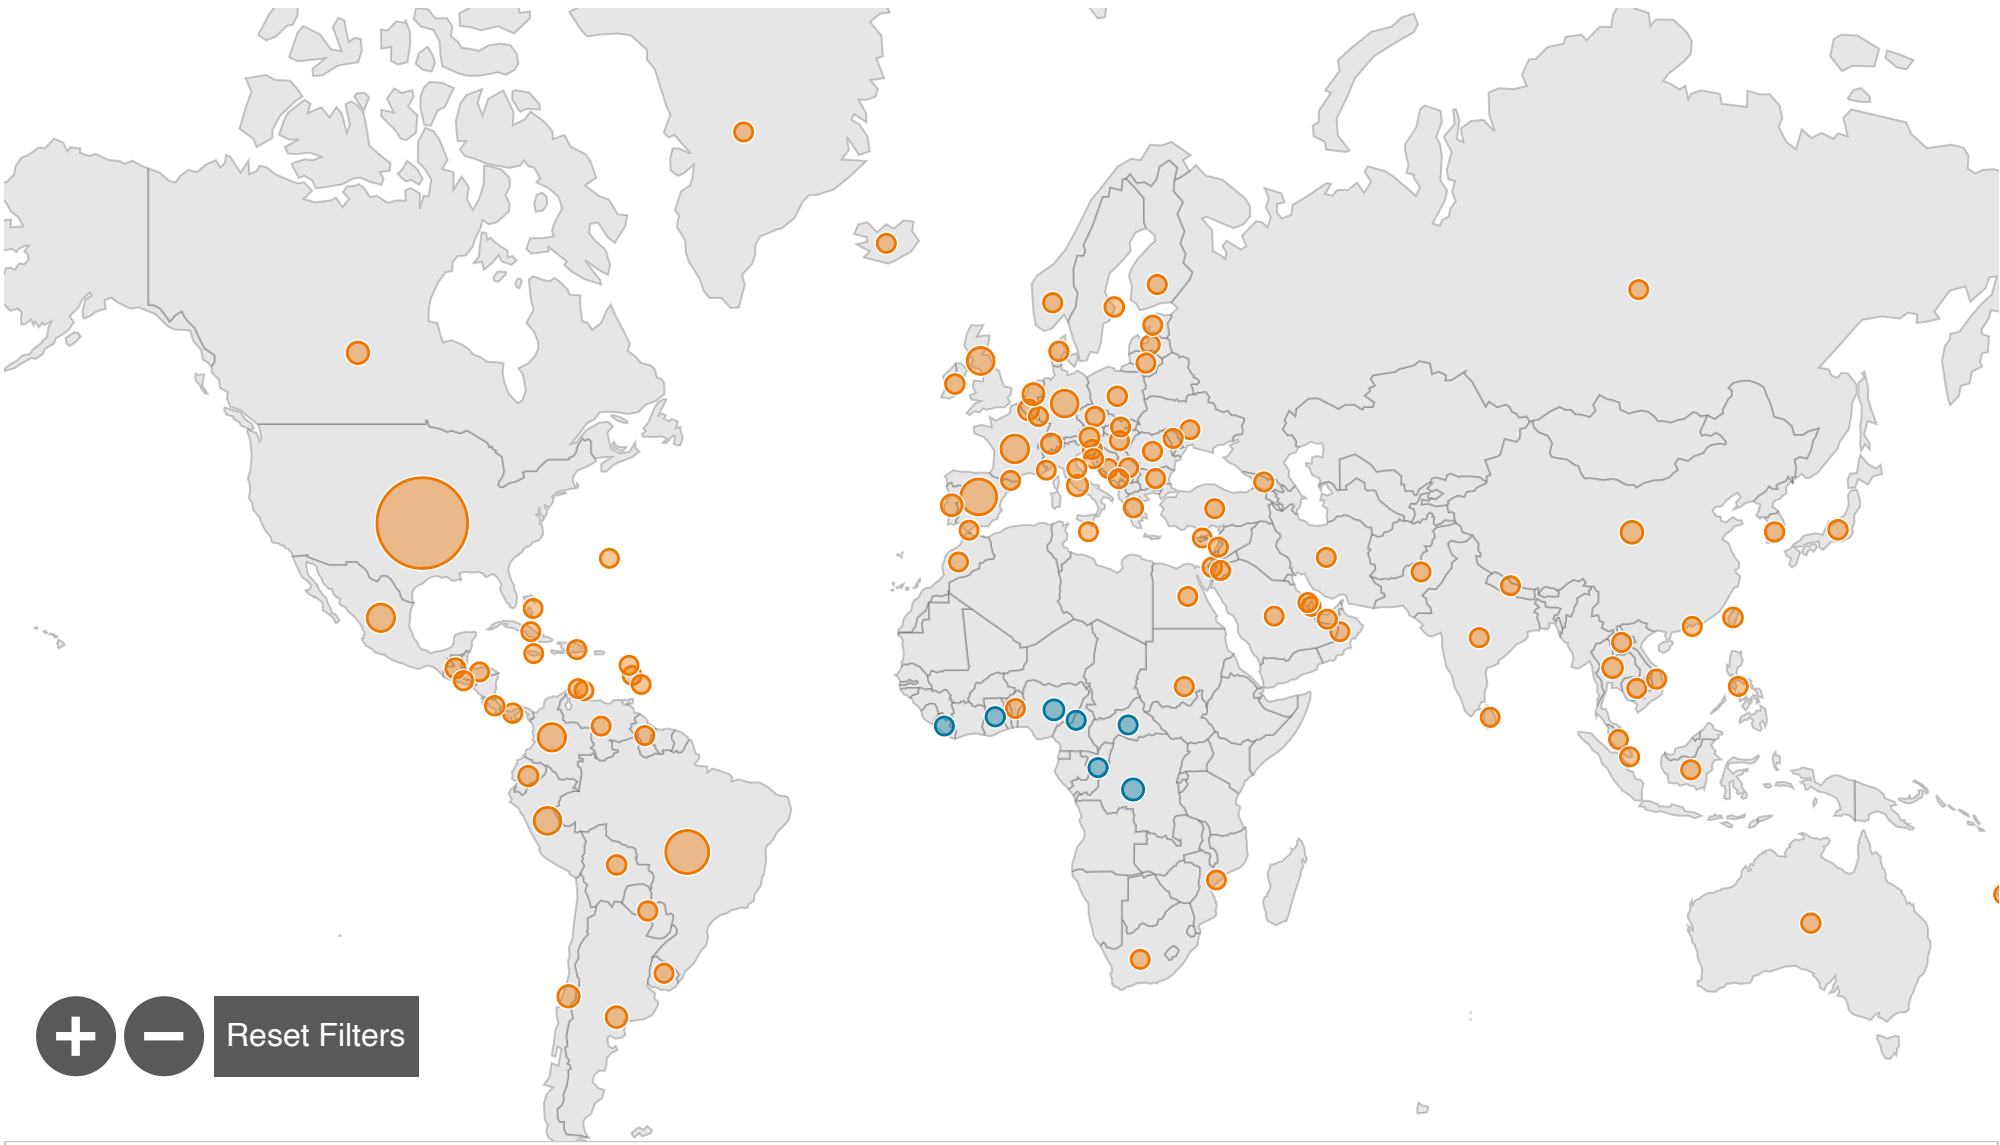

Total

111

Has not historically reported mpox

7

Has historically reported mpox

Legend

- Has not historically reported mpox
- Has historically reported mpox

● <a href="#">Vietnam</a>	137	6

**Notes:** Case data reported since January 1, 2022 are provided for situational awareness and subject to change. Confirmed cases include those laboratory-confirmed as mpox virus and may include cases only confirmed as orthopoxvirus. Among locations (including countries, territories, and areas) that have not historically reported mpox, several have reported sporadic cases linked to travel or imported animals prior to 2022. Additionally, Ghana has not historically reported mpox cases, however, the country was identified as the source of a shipment of wild mammals that subsequently led to the [2003 outbreak in the U.S.](#)
