WEEKLY COVID-19 VACCINATION DASHBOARD

The Weekly COVID-19 Vaccination Dashboard is designed to share weekly COVID-19 vaccination data, including coverage estimates and intent for vaccination, using a variety of data sources including surveys, healthcare claims, electronic medical records, and immunization information systems (IIS) data. The Dashboard will be updated weekly as new data become available. Additional COVID-19 vaccination data, resources, and publications are [available](#). Please [email](#) to share any feedback.

Data Summary

Child Coverage and Parental Intent for Vaccination (NIS) 

[Data and Charts for Child Coverage >](#)

Child COVID-19 Vaccination Coverage

COVID-19 vaccination coverage for [children](#) 6 months through 17 years is based on data from CDC's National Immunization Survey-Flu (NIS-Flu). Estimates of vaccination coverage are based on parental report.

- As of March 30, 2024, 14.0% (95% Confidence Interval: 13.4%-14.6%) of children were reported to be up to date with the 2023-24 COVID-19 vaccine.
 - An additional 7.9% (6.4%-9.4%) of children had a parent who reported they definitely planned to get their child vaccinated.
 - Reported receipt of the COVID-19 vaccine was low across all socio-demographic subgroups and has consistently varied by child's age, race and ethnicity, poverty status, urbanicity, and mother's education level.
 - Additional COVID-19 vaccination data for children by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
-

Pregnant Persons Coverage (VSD)

[Data and Charts for Pregnant Persons Coverage >](#)

Pregnant Persons COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates for [pregnant persons](#) 18 to 49 years are based on data from CDC's [Vaccine Safety Datalink](#). Estimates of vaccination coverage are based on electronic health data from multiple integrated health systems.

- As of March 30, 2024, 13.4% of pregnant persons had received the updated 2023-24 COVID-19 vaccine.
 - Vaccination coverage was highest among non-Hispanic Asian (22.7%) pregnant persons and lowest among non-Hispanic Black (5.8%) pregnant persons.
 - Additional COVID-19 vaccination data for pregnant persons are available: [Coverage by Population: Pregnant Women](#).
-

Adult Coverage and Intent (NIS)

[Data and Charts for All Adults Coverage >](#)

Adult COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates among [adults 18 years and older](#) are based on data from CDC's National Immunization Survey-Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of March 31, 2024, 22.6% (95% Confidence Interval: 22.1%-23.1%) of adults reported having received an updated 2023-24 COVID-19 vaccine since September 14, 2023.
- An additional 9.9% (8.2%-11.5%) reported that they definitely plan to get vaccinated.
- Vaccination coverage increased by age and was highest among adults 75 years and older [44.5% (41.4%-47.5%)].
- White adults had higher vaccination coverage than adults in all other race and ethnicity groups, with coverage ranging from 15.8% (14.6%-17.1%) among Hispanic adults to 25.7% (25.1%-26.3%) among non-Hispanic White adults.
- Vaccination coverage was lower among adults residing in rural areas [17.7% (16.8%-18.6%)] than among those living in suburban [23.1% (22.4%-23.8%)] and urban [23.8% (23.0%-24.7%)] areas.
- Vaccination coverage was higher among insured adults [24.6% (24.1%-25.2%)] than uninsured adults [8.5% (7.4%-9.6%)].
- Across states and the District of Columbia, vaccination coverage ranged from 9.8% (8.4%-11.3%) in Mississippi to 41.6% (38.1%-45.1%) in Vermont.
- Additional COVID-19 vaccination data for adults by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).

Vaccine Administration and Coverage by Jurisdiction (IIS)

[Data and Charts for Jurisdiction Vaccine Administration and Coverage >](#)

Monthly Jurisdiction Vaccine Administration and Coverage (IIS)

Updated 2023-24 COVID-19 vaccination coverage estimates as of the end of February 2024 based on IIS data submitted to CDC by 51 immunization awardee jurisdictions.

- For children 6 months – 17 years:
 - Among the currently reporting 43 state and city IIS jurisdictions, COVID-19 vaccination coverage among children 6 months – 17 years ranged from 0.5% to 16.0%. Among 8 U.S. territorial and affiliated island jurisdictions, coverage ranged from 0.0% to 1.5%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).
- For adults 18 years and older:
 - Among the currently reporting 43 state and city IIS jurisdictions, COVID-19 vaccination coverage among adults 18 years and older ranged from 1.0% to 26.5%. Among 8 U.S. territorial and affiliated island jurisdictions, coverage ranged from 0.0% to 3.2%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).

Adults 65+ Coverage (CMS)

[Data and Charts for Adults 65+ Coverage >](#)

Adults 65 Years and Older (Medicare Fee-for-service) COVID-19 Vaccination Coverage

COVID-19 vaccination coverage among [Medicare fee-for-service beneficiaries 65 years and older](#)  is assessed using data files from the Medicare Fee-For-Service administrative claims data managed by the Centers for Medicare & Medicaid Services.

- As of January 27, 2024, an estimated 28.1% of Medicare fee-for-service beneficiaries 65 years and older were vaccinated.
- Estimates by race and ethnicity group: 10.4% of Hispanic adults, 20.8% of Black, non-Hispanic adults, 29.0% of White, non-Hispanic adults, 26.9% of adults of Other, non-Hispanic race and ethnicity, and 24.8% of Asian, non-Hispanic adults were vaccinated.

Adult Vaccinations Administered (IQVIA)

[Data and Charts for Adult Vaccinations Administered >](#)

Updated 2023-24 COVID-19 Vaccinations Administered in Pharmacies and Medical Offices (Data Source: IQVIA)

COVID-19 vaccinations administered at retail pharmacies and American Medical Association (AMA) physicians' medical offices for [adults 18 years and older](#) based on healthcare claims data.

- As of March 16, 2024, an estimated 30.13 million doses were administered in retail pharmacies and an estimated 2.36 million doses were administered in physicians' medical offices.
