

## Delta Variant 24 Vid 3 – Audio Description & Audio Transcript

<b>Time marker (h:m:s)</b>	<b>Audio Descriptions Images shown on screen</b>	<b>Text shown on screen</b>	<b>Dialogue Transcript</b>
0:00:00	Title Graphic “Can You Spread the Delta Variant When You Don’t Feel Sick?” displayed with HHS/CDC logo and Project Firstline logo	Can You Spread the Delta Variant When You Don’t Feel Sick?	
0:00:03	Video of Dr. Abby Carlson speaking while sitting in an office	Abby Carlson, MD Infectious Diseases Doctor Centers for Disease Control and Prevention	Why are steps like source control important all the time?
0:00:08			It's because we know that many people who are infected with SARS-CoV-2,
0:00:13			the virus that causes COVID-19,
0:00:15			don't actually know it, because they aren't feeling any symptoms.
0:00:20			They don't have fever, cough, shortness of breath, or other signs of disease.
0:00:26	Line drawing of four people going about daily activities.	Like with other variants of SARS-CoV-2, some people infected with the Delta variant might not feel sick.	And even though they don't look or feel sick, they can still spread virus to other people.
0:00:33	Video of Dr. Carlson		What's important is to keep doing the recommended infection control actions,
0:00:37			like masking for source control,
0:00:39			to keep that virus from spreading even if you don't know if you have the virus,
0:00:45			and even if you aren't

			feeling sick,
0:00:47			that way you're still protecting other people by having a mask on.
0:00:52	Line drawing of two medical professionals and a patient, each wearing a face mask.	Stop the spread of the Delta variant in healthcare with masking requirements for staff, patients/residents, and visitors.	
0:00:57	Text graphic "Healthcare infection control tools for COVID-19 still work for Delta" displayed with HHS/CDC logo and Project Firstline logo.	Healthcare infection control: Tools for COVID-19 still work for Delta.  Project Firstline – CDC's National Training Collaborative for Healthcare Infection Prevention & Control
