

Facebook Story – Audio Description

Time marker (h:m:s)	Images shown on screen	Text shown on screen (video has no audio)
0:00:00	HHS/CDC logo. Project Firstline logo.	U. S. Department of Health and Human Services. Centers for Disease Control and Prevention (CDC). Project Firstline.
0:00:01	Stylized artwork showing different spherical, studded viruses.	Viruses develop new variants regularly.
0:00:05	Two people face each other in silhouette. Bright dots flow between them.	Delta is a variant of SARS-CoV-2, the virus that causes COVID-19, that spreads more easily from person to person.
0:00:12	Artwork showing several of the same type of spherical, studded virus.	With the Delta variant, the basic structure of the virus has not changed, and that basic structure is what is important for infection control.
0:00:19		Healthcare infection control actions for COVID-19 STILL WORK!
0:00:22	Animation of healthcare worker washing her hands thoroughly with soap and water. She is wearing a mask covering her nose and mouth.	- using recommended PPE - environmental cleaning and disinfection - physical distancing - good ventilation - hand hygiene - masking
0:00:30	Artwork showing healthcare workers engaging in infection control measures, such as wearing masks covering both nose and mouth, wearing gloves, disinfecting areas. A hand-drawn line circles and re-circles the phrase “keep taking the recommended infection control actions at work.”	Because we are seeing variants, like Delta, it’s more important than ever to keep taking the recommended infection control actions at work.
