

Topic 7: Ppe part 1 – Eye protection

Agenda

- Introductions
- Videos and Discussion
 - PPE Overview
 - Eye Protection
- Next Steps

Learning objectives

- Define PPE and describe two (2) functions of PPE in healthcare.
- Discuss one (1) reason that eye protection is recommended for COVID-19.

Introductions

Please introduce yourself with:

- Your name
- Your role (e.g., organization, unit)

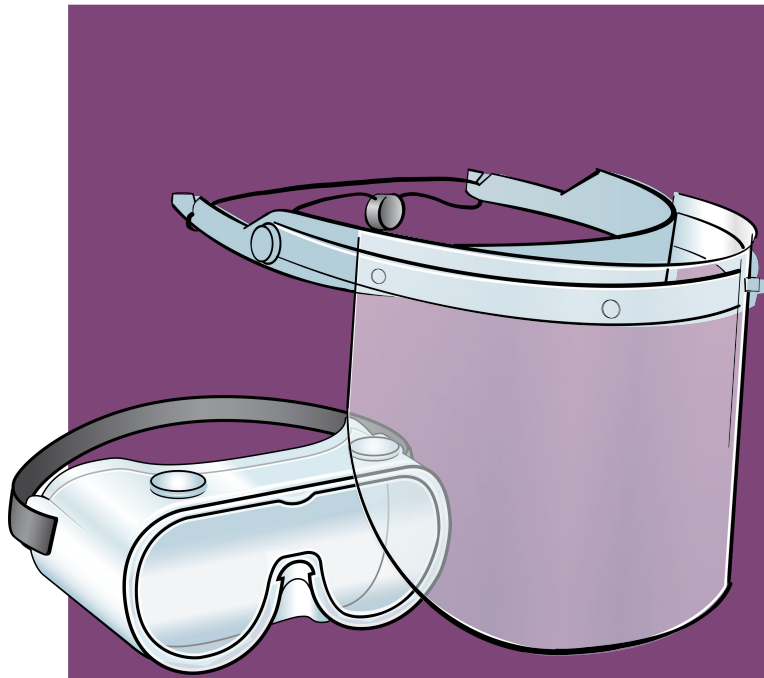

- How would you **define PPE?**

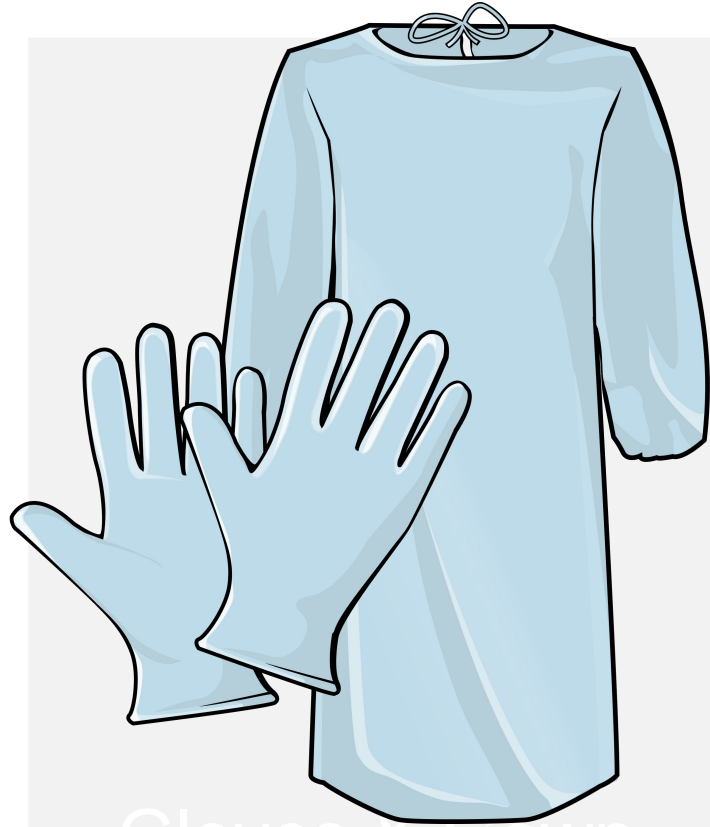

How does ppe work?

- **1.** PPE protects YOU from things in the environment.
 - **2.** PPE protects OTHERS from germs you might be carrying.
-
- For PPE to work, it must be worn correctly every time.

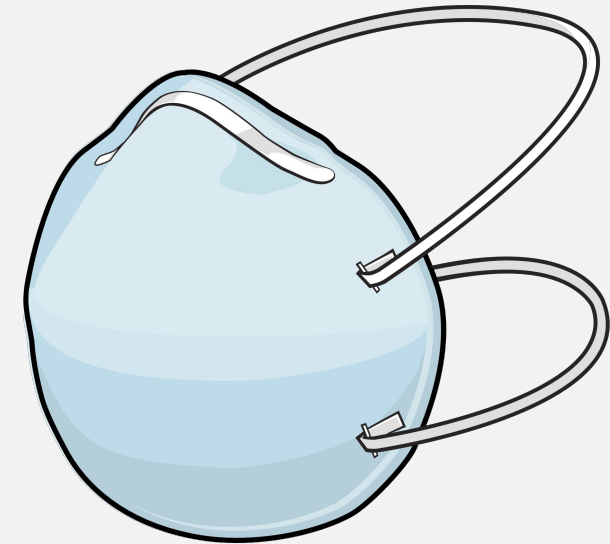

Recommended PPE for COVID-19

Eye Protection

Gloves & Gown

Respirator

- Why do you think **eye protection** is important?

INSIDE INFECTION CONTROL

WHY IS EYE PROTECTION RECOMMENDED FOR COVID-19?

EPISODE 10

Why is eye protection Recommended for covid-19?

- In addition to getting in the nose and mouth, or being inhaled, the virus can get into the nose and throat through the tear ducts and cause infection.
- Respiratory droplets that can carry virus can land on your eyes and travel from your eyes to reach the “target zones” of the nose, mouth, back of the throat, and lungs.
- Some viruses can also infect cells in the eye directly.

Whatever is used to protect the eyes should allow you to see clearly and do your work safely.

Discussion

- Using eye protection at your workplace
 - **1.** How is eye protection used at your workplace?
 - What does your workplace do well?
 - **2.** What strategies could you use to suggest improvements?

Reflection

- What **questions** do you still have?

Key Takeaways

- PPE is used in healthcare both to **protect YOU** and to **protect OTHERS**.
- Eye protection is recommended for COVID-19 because the **virus can enter the body through the eyes**.
- Whatever is used to protect your eyes should allow you to **see clearly and do your work safely**.
