## Weekly COVID-19 Vaccination Dashboard

**COVIDVaxview**

# WEEKLY COVID-19 VACCINATION DASHBOARD

The Weekly COVID-19 Vaccination Dashboard is designed to share weekly COVID-19 vaccination data, including coverage estimates and intent for vaccination, using a variety of data sources including surveys, healthcare claims, electronic medical records, and immunization information systems (IIS) data. The Dashboard will be updated weekly as new data become available. Additional COVID-19 vaccination data, resources, and publications are [available](#). Please [email](#) to share any feedback.

[Data Summary](#)[Child Coverage and Parental Intent for Vaccination \(NIS\)](#) [Data and Charts for Child Coverage >](#)

## Child COVID-19 Vaccination Coverage

COVID-19 vaccination coverage for [children](#) 6 months through 17 years is based on data from CDC's National Immunization Survey-Flu (NIS-Flu). Estimates of vaccination coverage are based on parental report.

- As of April 13, 2024, 14.0% (95% Confidence Interval: 13.5%-14.6%) of children were reported to be up to date with the 2023-24 COVID-19 vaccine.
  - An additional 8.1% (6.5%-9.6%) of children had a parent who reported they definitely planned to get their child vaccinated.
  - Reported receipt of the COVID-19 vaccine was low across all socio-demographic subgroups and has consistently varied by child's age, race and ethnicity, poverty status, urbanicity, and mother's education level.
  - Additional COVID-19 vaccination data for children by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
- 

## Pregnant Persons Coverage (VSD)

[Data and Charts for Pregnant Persons Coverage >](#)

### Pregnant Persons COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates for [pregnant persons](#) 18 to 49 years are based on data from CDC's [Vaccine Safety Datalink](#). Estimates of vaccination coverage are based on electronic health data from multiple integrated health systems.

- As of April 13, 2024, 13.4% of pregnant persons had received the updated 2023-24 COVID-19 vaccine.
  - Vaccination coverage was highest among non-Hispanic Asian (22.8%) pregnant persons and lowest among non-Hispanic Black (5.9%) pregnant persons.
  - Additional COVID-19 vaccination data for pregnant persons are available: [Coverage by Population: Pregnant Women](#).
- 

## Adult Coverage and Intent (NIS)

[Data and Charts for All Adults Coverage >](#)

### Adult COVID-19 Vaccination Coverage

COVID-19 vaccination coverage estimates among [adults 18 years and older](#) are based on data from CDC's National Immunization Survey-Adult COVID Module. Estimates of vaccination coverage are based on respondent self-report.

- As of April 13, 2024, 22.8% (95% Confidence Interval: 22.3%-23.2%) of adults reported having received an updated 2023-24 COVID-19 vaccine since September 14, 2023.
- An additional 8.7% (7.9%-9.6%) reported that they definitely plan to get vaccinated.
- Vaccination coverage increased by age and was highest among adults 75 years and older [42.3% (40.4%-44.2%)].
- White adults had higher vaccination coverage than adults in all other race and ethnicity groups, with coverage ranging from 15.2% (11.6%-18.7%) among non-Hispanic American Indian/Alaska Native adults to 25.7% (25.2%-26.2%) among non-Hispanic White adults.
- Vaccination coverage was lower among adults residing in rural areas [17.8% (16.9%-18.6%)] than among those living in suburban [23.1% (22.5%-23.8%)] and urban [24.1% (23.3%-25.0%)] areas.
- Vaccination coverage was higher among insured adults [24.7% (24.2%-25.2%)] than uninsured adults [9.3% (7.9%-10.6%)].
- Across states and the District of Columbia, vaccination coverage ranged from 10.4% (8.9%-12.0%) in Mississippi to 41.8% (38.1%-45.4%) in Vermont.

- Additional COVID-19 vaccination data for adults by demographic characteristics at the national level and overall estimates by jurisdiction are [available](#).
- 

## Vaccine Administration and Coverage by Jurisdiction (IIS)

[Data and Charts for Jurisdiction Vaccine Administration and Coverage >](#)

### Monthly Jurisdiction Vaccine Administration and Coverage (IIS)

Updated 2023-24 COVID-19 vaccination coverage estimates as of the end of February 2024 based on IIS data submitted to CDC by 51 immunization awardee jurisdictions.

- For children 6 months – 17 years:
    - Among the currently reporting 43 state and city IIS jurisdictions, COVID-19 vaccination coverage among children 6 months – 17 years ranged from 0.5% to 16.0%. Among 8 U.S. territorial and affiliated island jurisdictions, coverage ranged from 0.0% to 1.5%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).
  - For adults 18 years and older:
    - Among the currently reporting 43 state and city IIS jurisdictions, COVID-19 vaccination coverage among adults 18 years and older ranged from 1.0% to 26.5%. Among 8 U.S. territorial and affiliated island jurisdictions, coverage ranged from 0.0% to 3.2%. The coverage of some Pacific Island jurisdictions may reflect vaccination program activities aligned with regional virus circulation patterns (i.e., they may vaccinate on a different schedule than the continental U.S.).
- 

## Adults 65+ Coverage (CMS)

[Data and Charts for Adults 65+ Coverage >](#)

### Adults 65 Years and Older (Medicare Fee-for-service) COVID-19 Vaccination Coverage

COVID-19 vaccination coverage among [Medicare fee-for-service beneficiaries 65 years and older](#)  is assessed using data files from the Medicare Fee-For-Service administrative claims data managed by the Centers for Medicare & Medicaid Services.

- As of January 27, 2024, an estimated 28.1% of Medicare fee-for-service beneficiaries 65 years and older were vaccinated.
  - Estimates by race and ethnicity group: 10.4% of Hispanic adults, 20.8% of Black, non-Hispanic adults, 29.0% of White, non-Hispanic adults, 26.9% of adults of Other, non-Hispanic race and ethnicity, and 24.8% of Asian, non-Hispanic adults were vaccinated.
- 

## Adult Vaccinations Administered (IQVIA)

[Data and Charts for Adult Vaccinations Administered >](#)

Updated 2023-24 COVID-19 Vaccinations Administered in Pharmacies and Medical Offices (Data Source: IQVIA)

COVID-19 vaccinations administered at retail pharmacies and American Medical Association (AMA) physicians' medical offices for [adults 18 years and older](#) based on healthcare claims data.

- As of March 30, 2024, an estimated 30.61 million doses were administered in retail pharmacies and an estimated 2.42 million doses were administered in physicians' medical offices.
