

Influenza (Flu)

## Influenza (Flu)

# Information for the 2024-2025 Flu Season

The [composition of flu vaccines](#) has been updated. Flu vaccines for the U.S. 2024-2025 season will contain the following:

### Egg-based vaccines

- an A/Victoria/4897/2022 (H1N1)pdm09-like virus;
- an A/Thailand/8/2022 (H3N2)-like virus; and **(Updated)**
- a B/Austria/1359417/2021 (B/Victoria lineage)-like virus.

### Cell- or recombinant-based vaccines

- an A/Wisconsin/67/2022 (H1N1)pdm09-like virus;
- an A/Massachusetts/18/2022 (H3N2)-like virus; and **(Updated)**
- a B/Austria/1359417/2021 (B/Victoria lineage)-like virus.

All flu vaccines for the 2024-2025 season are anticipated to be trivalent in the United States. Trivalent flu vaccines are formulated to protect against three flu viruses (an A(H1N1) virus, an A(H3N2) virus, and a B/Victoria virus). Both trivalent and quadrivalent flu vaccines are expected to offer similar protection against the flu viruses they protect against. B/Yamagata flu viruses have not circulated in the population after March 2020, so protection from trivalent and quadrivalent flu vaccines is expected to be similar. More information about [trivalent flu vaccines](#) is available.
