

# Respiratory Illnesses

## Respiratory Virus Data Channel Weekly Snapshot

Provides a summary of the key viral respiratory illness findings for COVID-19, influenza, and RSV from the past week and access to additional information and figures.

*Note: data summaries are based on CDC subject matter expert interpretation of publicly available findings across multiple data systems, some of which are not included in the data visualizations on these web pages.*

The amount of respiratory illness (fever plus cough or sore throat) causing people to seek healthcare **continues to decrease** nationally and across most areas of the country. This week, no jurisdictions experienced moderate, high, or very high activity.

*Reported on Friday, May 10th, 2024.*

### Summary

Seasonal influenza, COVID-19, and RSV activity continues to decrease in most areas of the country.

### COVID-19

Most key indicators, including [wastewater viral activity](#), are showing low levels of activity nationally.

### Influenza

Nationally, seasonal influenza activity continues to decrease. Additional information about current influenza activity can be found at: [Weekly U.S. Influenza Surveillance Report | CDC](#)

### RSV

All ten regions of the country are below the [3% percent positivity epidemic threshold](#) indicating that the RSV season has ended. Hospitalization rates are low in all age groups.

### Vaccination

National vaccination coverage for COVID-19, influenza, and RSV vaccines [remained low for children and adults](#) for the 2023-24 respiratory illness season. [COVID-19 vaccines continue to be recommended](#) and can provide a layer of protection.

## Explore deeper data

### Wastewater

Wastewater (sewage) data specific to SARS-CoV-2, the virus that causes COVID-19, are displayed at the national, regional, and state levels. These data can provide an early signal of changes in infection levels.

### Nursing Homes

Data on COVID-19 cases and deaths among residents and staff of nursing homes are displayed at the national and state levels.

### Voluntarily Reported Hospitalizations Data

Weekly trends in COVID-19-related and overall hospital bed occupancy.

### Forward Outlook

Estimated trends for COVID-19 and influenza infections and hospitalizations, based on modeling and forecasting, are displayed at the national and state levels.
