# Ebola Survivors: How to Use a Male Condom

1  
Carefully open and remove the condom.

2  
Use the condom when the penis is hard.

3  
Place condom on penis head.

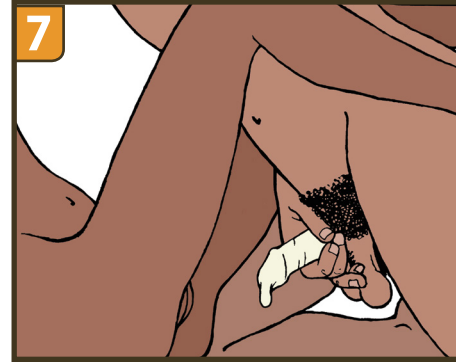

4  
Pinch air out of the tip of the condom.

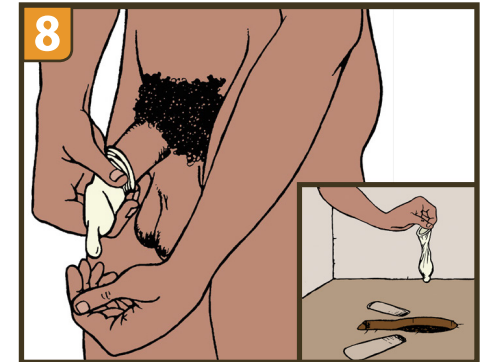

5  
Unroll the condom all the way down the penis.

6  
Use a condom every time you do man woman business.

7  
After doing man woman business, the survivor should hold condom on the bottom of the penis and pull out of the vagina.

8  
The survivor should remove the condom and throw it away.

- After doing man woman business, **only** the Ebola survivor should touch the used condom.
- After touching used condoms, wash your hands with soap and water for 40-60 seconds. You can use an alcohol-based hand rub for 20-30 seconds if soap and water are not available. If hands are visibly dirty, use soap and water.
- **Never** reuse condoms. **Never** use two condoms at the same time.
- If any symptoms of Ebola develop within 21 days after contact with white water from a man who has had Ebola, **get care quick quick**.
