

Foodborne outbreaks

# Active Investigations of Multistate Foodborne Outbreaks

#### WHAT TO KNOW

• CDC typically coordinates between 17 and 36 investigations of foodborne illnesses involving multiple states each week. The table below shows the number of active CDC investigations for *Campylobacter*, Shiga toxin-producing *E. coli, Listeria monocytogenes*, and *Salmonella*. It also includes links to any current CDC outbreak notices.

### Active multistate outbreaks

Last Updated June 12, 2024 (updated every Wednesday)

Germ	Number of Active Multistate Investigations	Current CDC Investigation Notices or Food Safety Alerts
<u>Campylobacter</u>	0	No active notices or alerts
E. coli	1	Food Safety Alert: Organic Walnuts
<u>Listeria</u>	3	No active notices or alerts
<u>Salmonella</u>	13	<ul> <li>Food Safety Alert: <u>Fresh Basil</u></li> <li>Investigation Notice: <u>Cucumbers</u></li> </ul>

## What CDC and partners do to respond

CDC works closely with our federal regulatory partners, FDA and USDA-FSIS, on foodborne outbreak investigations. For more information about how they work to identify and remove contaminated food from the market, visit their websites:

- FDA Investigations ☑
- <u>USDA-FSIS Investigations</u> ☑

### Resources

Foodborne outbreaks are sometimes caused by other germs. For more information about these outbreaks, visit these websites:

- CDC Current Outbreak List
- Cyclospora
- Hepatitis A virus
- Shigella
- Vibrio
