

JULY 3, 2024

Active Investigations of Multistate Foodborne Outbreaks

WHAT TO KNOW

- CDC typically coordinates between 17 and 36 investigations of foodborne illnesses involving multiple states each week. The table below shows the number of active CDC investigations for *Campylobacter*, Shiga toxin-producing *E. coli*, *Listeria monocytogenes*, and *Salmonella*. It also includes links to any current CDC outbreak notices.

Active multistate outbreaks

Last Updated July 3, 2024 (updated every Wednesday)

Germ	Number of Active Multistate Investigations	Current CDC Investigation Notices or Food Safety Alerts
Campylobacter	0	<ul style="list-style-type: none">• No active notices or alerts
E. coli	3	<ul style="list-style-type: none">• Food Safety Alert: Organic Walnuts
Listeria	5	<ul style="list-style-type: none">• No active notices or alerts
Salmonella	15	<ul style="list-style-type: none">• Food Safety Alert: Cucumbers

What CDC and partners do to respond

CDC works closely with our federal regulatory partners, FDA and USDA-FSIS, on foodborne outbreak investigations. For more information about how they work to identify and remove contaminated food from the market, visit their websites:
