

# Czech Republic - Nursing Students (3<sup>rd</sup> Year Students Only) Global Health Professions Student Survey (GHPSS)

## FACT SHEET . . . . .

The Czech Republic nursing students GHPSS includes data on prevalence of cigarette smoking and use of other tobacco products, knowledge and attitudes about tobacco use, exposure to second-hand smoke, desire for smoking cessation, and training received during nursing school regarding patient counseling on smoking cessation techniques. This information could be very useful in monitoring and developing Czech Republic's comprehensive tobacco control program.

The Czech Republic nursing students GHPSS was a census of 3<sup>rd</sup> year nursing students attending the 22 nursing schools in Czech Republic conducted in 2006. The school response rate was 81.8% and the student response rate was 86.0%. A total of 348 students participated in the Czech Republic nursing students GHPSS.
