

Slovakia - Nursing Students (3rd Year Students Only)

Global Health Professions Student Survey (GHPSS)

FACT SHEET

The Slovakia nursing students GHPSS includes data on prevalence of cigarette smoking and use of other tobacco products, knowledge and attitudes about tobacco use, exposure to second-hand smoke, desire for smoking cessation, and training received during nursing school regarding patient counseling on smoking cessation techniques. This information could be very useful in monitoring and developing Slovakia's comprehensive tobacco control program.

The Slovakia nursing students GHPSS was a census of 3rd year nursing students attending the 7 nursing schools in Slovakia conducted in 2006. The school response rate was 100% and the student response rate was 90.2%. A total of 405 students participated in the Slovakia nursing students GHPSS.

Prevalence

99.7% ever smoked cigarettes (Males = 100.0%, Females = 99.7%)
32.2% currently smoke cigarettes (Males = 41.8%, Females = 31.7%)
