

# Kyrgyzstan - Medical Students (3<sup>rd</sup> Year Students Only) Global Health Professions Student Survey (GHPSS)

## **FACT SHEET . . . . .**

The Kyrgyzstan medical students GHPSS includes data on prevalence of cigarette smoking and use of other tobacco products, knowledge and attitudes about tobacco use, exposure to second-hand smoke, desire for smoking cessation, and training received during medical school regarding patient counseling on smoking cessation techniques. This information could be very useful in monitoring and developing Kyrgyzstan's comprehensive tobacco control program.

The Kyrgyzstan medical students GHPSS was a census of 3<sup>rd</sup> year medical students attending the 1 medical school in Kyrgyzstan that was conducted in 2008. The school response rate was 100% and the student response rate was 92.7%. A total of 112 students participated in the Kyrgyzstan medical students GHPSS.
