

Czech Republic - Dental Students 2011 (3rd Year Students Only) Global Health Professions Student Survey (GHPSS)

FACT SHEET

The Czech Republic dental students GHPSS includes data on prevalence of cigarette smoking and use of other tobacco products, knowledge and attitudes about tobacco use, exposure to second-hand smoke, desire for smoking cessation, and training received during dental school regarding patient counseling on smoking cessation techniques.

This information could be very useful in monitoring and developing Czech Republic's comprehensive tobacco control program. The Czech Republic dental students GHPSS was a census of third year dental students attending four dental schools in Czech Republic conducted in 2011. A total of 187 3rd year students participated in the Czech Republic dental students GHPSS. The overall response rate of all dental students surveyed was 81.3%.
